

Conquer Cancer

The Simple Home Remedy and Treatment Guide

Medical Research Discovery (Canada), 2007

Guide Book By: Dr. H. Kaur

If you are reading this then either you or a loved one has Cancer.

Your life has changed.

Your life revolves around Doctors, Hospitals, all kinds of tests and harsh treatments that are as bad, sometimes worse, than the disease itself.

It does NOT have to be that way.

A Medical Discovery was made at the University of Alberta (Canada) in 2007 and can change all that suffering and expense.

For just a few dollars a day, there is a **product that works, with your body, to shrink cancer tumors by 70% in 3 weeks.** Patients can expect to feel better within 1 month; but patients and their families have reported improvement in only one day. In fact, many reports that - within just 12 hours - a flush returns to the skin, vitality to the eyes... Life returning to cancer patients!

Sodium Dichloroacetate (Pure DCA) is a salt. It is safer than common table salt. It is a "simple" compound that **works WITH THE BODY to heal cancer.** Pure DCA has a molecular structure so small it can get into areas of the body that are unable to be reached with other cancer therapies. **Pure DCA ONLY targets the sick, diseased, cancer cells and does no damage to any other healthy cells.**

So, **PureDCA is a non-invasive, safe cancer therapy that shows results in DAYS...** so why don't you already know about it? Why hasn't your doctor told you about it? Simple Answer: there is no money in this cancer therapy for Big-Pharma*. The Pharmaceutical Industry wants to keep cancer patients sick and on conventional therapies (surgery, radiation, chemotherapy - see ["Cut, Poison Burn" movie](#)) because it makes them billions of dollars per month. In "Cut, Poison, Burn" they discuss DCA at the 46 minute mark in the movie.

The pharmaceutical industry will not make DCA. It is too inexpensive for them to bother with. If they cannot make HUGE Profits they will not patent the medicine - they are interested in money not healing. So, unless your doctor is up on his latest medical research he will not be familiar with this miraculous discovery. However, it is important to remember that **DCA does not need a prescription** because it is a compound - not a drug.

It is also important to recognize that Pure DCA has been **safely used by humans for decades** to treat lactic acidosis and other mitochondrial impairments in the cells - just not for cancer treatments and therapies. Not until the 2007 discovery of tumor shrinkage of 70% in 3 weeks.

It should be criminal to not make this cancer treatment available to everyone with cancer. The trouble has been finding a quality source of Pure DCA.

Some websites have made it available online but they have diluted the product. They start with "pharmaceutical grade Pure DCA powder" but then dilute it with baking soda. This is like taking

orange concentrate and adding tons of water to it - it WAS pure orange juice but now it is diluted and won't taste the same or have the same nutritional value! Obviously, if you buy their diluted medicine you cannot give the correct amount of Pure DCA.

Pure DCA potency is adversely affected when it is exposed to oxygen and heat. Many pharmacists do not know this and end up with a compromised, less effective product. There is also a website selling powder from Europe that arrives "clumpy". This means the DCA has been exposed to humidity - it still will work but you will need more of it to reduce your tumors.

PureDCA.com was created to make this cure readily available to everyone around the world in its purest and un-diluted form. They have been treating all cancers, all stages since 2007 with great success. They have a team who coach and monitor this cancer therapy customizing the Dosing Protocols for each and every patient based on the patient's weight and the cancer they are treating. As of this writing they are also the only manufacturers with Pure DCA in capsule form which is (1) better than Pure DCA Powder alone and (2) easier to take.

It is now time to publicize these successes and make this easy, in-home cancer treatment a mainstream cancer therapy.

Originally the cancer therapy used Pure DCA in powder form. But, at the request of patients in 2009, they started having the Pure DCA powder measured and encapsulated making it easier to dose oneself. This is particularly important for those patients who are older or sicker and cannot operate a digital weigh scale. The Pure DCA capsules are also good if you need to take medicine to work or if you are travelling with it.

During the initial years they also learnt of the necessity to add thiamin (Vitamin B1) supplementation to the treatment protocol to both prevent and treat neuropathy. Neuropathy is the tingling and numbness some cancer patients get in their extremities, especially after chemotherapy. It is a simple vitamin B1 deficiency that is completely reversible - there is no need to suffer from it.

If you have read anything about DCA on the internet it is old information if it is not including the thiamin supplementation. Websites that first introduced DCA to the world in 2007 are no longer the "benchmark" of DCA cancer treatment - so please go directly to PureDCA.com for the most up-to-date research and treatment. Email any questions and the staff, researchers, and doctors will see that you receive quick, correct information.

They also give a valuable list of 14 Healing Tips & Recommendations to aid in the Healing Process.

Dosage Protocols are customized to

- (1) shrink tumors
- (2) stop cancer spreading
- (3) maintain a cancer-free body
- (4) Preventative Dosing Protocol.

PureDCA Capsule Dosage Guidelines

Cancer Treatments and Therapeutic Dosing using PureDCA Capsules

290	132	2	8	6	4	2 per day
300	136	2	8	6	4	2 per day
310	141	2	9	6	4	2 per day
320	145	2	9	7	5	2 per day
330	150	2	9	7	5	2 per day

* These are Blood Cancers, Lymphomas, Leukemias, Lymph, Bone - Not Tumors But Treatments for Systemic Ailments

** 2 of our Thiamin Capsules equals the recommended Daily Dose of 750mg for Cancer Therapy with PureDCA as each thiamin capsule contains 375mg

*** Thiamin does not need to be taken when dca is used as a preventative measure as the level of dca taken can be supported by the thiamin in most diets
Note: Daily Thiamin Dosing is usually 750mg DAILY however patients weighing less must match thiamin dose to dca dose (ie. only 1 thiamin capsule daily)

Treatment Protocol - to shrink tumors, reverse cancer

- 1) This dosage table is a safe and effective level for a **DAILY** "Healing Cancer" TREATMENT Protocol
- 2) **Daily Thiamin Dosage** is required to prevent neuropathy (tingling/numbness in the fingers, toes) - these symptoms are early signs of Thiamin-Deficiency
- 3) **Split the DAILY DOSE** of both the thiamin and DCA capsules in half and take 12 hours apart **WITH FOOD**
- 4) We do not recommend the Caffeine Protocol - Brain Cancer Patients should NEVER take caffeine in any form (and coffee makes body acidic)
- 5) Drink lots of good quality water to expel dead cancer cells easily
- 6) Eat an Alkaline Diet to move the body from an Acidic to Alkaline (Healthy) State
- 7) Never eat sugars or foods that convert to sugar in the body as these things feed cancer cells

Maintenance Protocol - when Cancer is in Remission

Once cancer is confirmed to have gone into remission, patients are to **HALF** their DAILY treatment dose of the Pure DCA and the thiamin and maintain the lifestyle described in the Healing Tips and Recommendations

Special Note: Patients are to Maintain at least one Pure DCA capsule per day to prevent cancer returning as their Mitochondrial Functioning in their cells is impaired and they are prone to cancer returning

PureDCA Powder Dosage Guidelines

NOTE: as an example, a patient weighing 160 pounds using the 'shrinking tumors' protocol would take a TOTAL of 1460 milligrams of DCA per day. This is approximately 1.5 grams in TOTAL each day. It is advised to split this total daily dose in half. Take half, 0.75 grams, in the morning and the other half, 0.75, grams in the evening.

Cancer Treatments and Therapeutic Dosing with PureDCA Powder

No parts of this page are allowed to be duplicated or used on other websites without express permission from PureDCA.com

Body Weight		Daily Dosing Thiamin** Powder	Amount of PureDCA Powder Required in Cancer Treatment			
in Pounds	in Kilograms		Shrinking Tumors 20mg/Kg/DAILY	All Brain Cancers 15mg/Kg/DAILY	Systemic Cancers* 10mg/Kg/DAILY	Preventative** 4mg/Kg/DAILY

320	145	750mg	2900	2175	1450	580
330	150	750mg	3000	2250	1500	600

* These are Blood Cancers, Lymphomas, Leukemias, Lymph, Bone - Not Tumors But Treatments for Systemic Ailments

** Thiamin Powder has an odd taste - if you do not like the taste, purchase thiamin capsules with your next order - take 375mg twice daily (with food)

*** Thiamin does not need to be taken when dca is used as a preventative measure as the level of dca taken can be supported by the thiamin in most diets

Note: Daily Thiamin Dosing is usually 750mg DAILY however patients weighing less must match thiamin dose to dca dose (ie. only 1 thiamin capsule daily)

Treatment Protocol - to shrink tumors, reverse cancer

- 1) This dosage table is a safe and effective level for a DAILY "Healing Cancer" TREATMENT Protocol (no "breaks")
- 2) Daily Thiamin Dosage is required to prevent neuropathy (tingling/numbness in the fingers, toes) - these symptoms are early signs of Thiamin-Deficiency
- 3) Split the DAILY DOSE of both the thiamin and Pure DCA Powder in half and take 12 hours apart (thiamin WITH FOOD if you have a sensitive stomach)
- 4) We do not recommend the Caffeine Protocol - Brain Cancer Patients should NEVER take caffeine in any form (and coffee makes body acidic)
- 5) Drink lots of good quality water to expel dead cancer cells easily
- 6) Eat an Alkaline Diet to move the body from an Acidic to Alkaline (Healthy) State
- 7) Never eat sugars or foods that convert to sugar in the body as these things feed cancer cells

Maintenance Protocol - when Cancer is in Remission

Once cancer is confirmed to have gone into remission, patients are to HALF their DAILY treatment dose of the Pure DCA and the thiamin and maintain the lifestyle described in the Healing Tips and Recommendations

Special Note: Patients are to Maintain at least one Pure DCA capsule per day to prevent cancer returning as their Mitochondrial Functioning in their cells is impaired and they are prone to cancer returning

TESTIMONIALS:

People often request "Cure Rates" and statistics. That is a difficult thing to measure since many people who find out about Pure DCA are already end stage patients that Western Medicine has "given up on" and "sent home to pass". Facts which make their successes that much more remarkable.

Statistics can also be made to say "anything" and **what you really want is for yourself or your loved one to be cured. And - for that - Pure DCA capsules can help. Get the tools so you can turn off the cancer and turn on to a new, re-vitalized life !**

Here are some recent testimonials:

This Cancer Treatment Should have been available sooner to save My Mom - a Personal Note from Dr. H. Kaur:

Since 2007 - Successes are numerous. And growing in number everyday. Pure DCA does not advertise - their patients advertise with their health, vitality, surviving against the odds.

I just wish it could have existed earlier. Why ? Because my Mom got bowel cancer in her late 40s and suffered through the Western model of cancer treatment with surgeries and chemotherapies that made her very sick, very weak, and it did not help her.

In fact it killed her. My Dad and 5 siblings lost her less than 2 years after the initial diagnosis and she had been a healthy, vibrant woman before.

I have no doubt Pure DCA would have cured her and she would still be with us.

This Therapy Guide Book is dedicated to her.

Everyday I heal people with a passion inspired from the love she gave me...

My life mission is to provide service and healing to cancer patients around the world.

We all have cancer cells but our body has an innate ability to kill them off. When someone gets "cancer" it is because a part of their body is malfunctioning and needs to be set right again. Cancer is not an alien substance that has invaded your body. Cancer cells are simply cells that forgot to "die off" and think they are "immortal". They need to be reminded that they are at the end of their life cycle and need to be replaced by younger, more vital cells.

Getting the "Big C" has been "scary" because they have marketed it that way to build a multi-billion dollar industry... it is based on fear... the fear of it is what paralyzes you.

Stop throwing more money at biased research done by big-pharma. Stop giving them money to continue building a culture of fear.

Cancer can be beaten - do it by helping the body help itself with Pure DCA.

The Miraculous Discovery

In 1930, the German biochemist **Otto Warburg**, discovered that tumor cells are the effect of a metabolic disorder in healthy cells. According to him, a tumor should be interpreted as a disturbance in the functioning of cellular mitochondria. He claimed that cancer cells do not use oxygen to produce energy, but get it from the decomposition of glucose. In 1931 he received a **Nobel Prize for his findings** in this field.

In 2006, a **Canadian researcher, Dr. Evangelos Michelakis from the University of Alberta**, revisited this theory. He asked a relatively simple question: “What would happen to a cancer cell if the functioning of its mitochondria could be restored?”

To find the answer, he chose the substance used that had been successfully reactivating cellular mitochondria for over 20 years in patients with lactic acidosis. That substance was Sodium Dichloroacetate (or Pure DCA). (It is important to note at this time that a lot of the information on the internet calls it sodium dichloroacetic acid - this is incorrect and has caused a lot of misrepresentation of valuable information. Even Wikipedia has it wrong. Sodium dichloroacetic acid is toxic and is NOT used in cancer treatments; sodium dichloroACETATE is what is used in medical research and cancer treatments. This is a crucial distinction.)

In January 2007, a reputable medical periodical “Cancer Cell” published the results of the Michelakis study. The team of scientists had transplanted tumor cells (brain, breast, and lung) to rats. For 3 weeks they have been giving them DCA diluted in water. After 3 weeks passed it turned out that the progress of the disease was stopped in both cases of in vivo and in vitro. Mitochondria were re-activated and the study “suggested that the mitochondria were not permanently damaged as was previously believed. They were inactive temporarily. As the mitochondria reactivated, the cells gained a new property” – a possibility of apoptosis (programmed cell death), which was blocked earlier.

Cancer tumors shrank. After 3 weeks their mass decreased by 70%. Interestingly, the substance used only worked against the cancer cells, leaving healthy cells intact.

Dr. Dario Altieri, director of the Cancer Center at the University of Massachusetts Medical School, noted that this new research shows that we may gain control over the tumor, stop its progress, and destroy it without damaging healthy cells.

The media went wild when the discovery was made - it headlined on many news channels.

Newsweek, January 23rd 2007 edition

"If there is a magic bullet though, it might be something like dichloroacetate, or DCA..."

Video One (2007) 3:28 (3 minutes long)

CTV News video

Sodium Dichloroacetate DCA BREAKING NEWS

<https://youtu.be/IDE7NhDj5Gg>

Dr. Evangelos Michelakis (University of Alberta) speaks to the CTV Medical Research Specialist, Avis Favaro, to explain his "Eureka ! Moment" using an old drug for a novel Cancer therapy. He shows them how he tested his theory by putting human cancer cells in rats and then shrinking the tumors by 70% in 3 weeks with NO SIDE EFFECTS .

Humans have used DCA for other ailments for decades and the "no side effects" in those treatments is verifiable.

He reveals pictures showing a drastic reduction in the tumor mass. These research tests used brain, lung, and breast cancer cells in the rats but, since then, all cancers and all stages have been treated with the PureDCA therapy. He says "the results are as good as it gets". DCA reactivates the cells so the cancer cells "die off".

This video also includes Dr. Dario Altieri (University of Massachusetts) addressing the desire of using DCA since its cancer fighting activity is high and its side effects minimal.

At 2 minute mark the video addresses how Pharmaceutical Industry will not develop this because they cannot own a patent and cannot make any money producing DCA.

Video Two (2007) 3:00 minutes

Global News Health Matters segment

Dichloroacetate (DCA

(video no longer available, description is here for educational purposes)

J'Lyn Nye of Global News introduces a newly discovered Non-Toxic Cancer Therapy, DCA. Su-Ling Goh, in the Health Matters segment of their news broadcast, interviews Sandy MacDougall from St. Albert who has suffered from several bouts with cancer (breast, liver, and brain) and explains the undesirable side effects of current cancer treatments including loss of hair, nausea, and other symptoms. The report describes dichloroacetate (DCA) as a "kinder, gentler Cancer therapy that does not kill healthy cells".

Dr. Evangelos Michelakis (Cardiologist, Lead DCA Researcher at University of Alberta) addresses how current cancer therapies also cause death in healthy heart cells, healthy lung cells, healthy skin cells, and healthy stomach cells (this is what causes nausea) - serious problems with the current cancer therapies that cause the cancer patient additional health problems.

Michelakis explains that the cancer in cells changes the cell's metabolism and makes the cells resistant to death and that DCA corrects this malfunction at the cellular level easily treating and halting cancer tumor growth.

DCA has passed its first phase trials.

They are now trying to get money to do larger clinical trials.

Video Three (2007) 5:48 minutes
The Real Story Healthtime Prime
https://youtu.be/la_uFFs_mb8

Cancer is the second leading cause of death in USA.

Leaving half a million families each and every year with a loss of a loved one.

Good News: Discovery in Canada of DCA - cheap, simple treatment that kills almost all cancers without side effects -- **but you can't get it !**

DCA Miracle: University of Alberta findings kill cancer cells but do not kill healthy cells.

But No Patent, so Drug Companies are not interested in producing DCA.

Dr. Evangelos Michelakis (University of Alberta) does not want to call it a "cancer cure" but he is optimistic (for liability purposes). But says DCA has been used in sick children for over 30 years (says DCA is "well tolerated" in children - so safe). Michelakis is trying to get money for Clinical Trials at this point. Michelakis also warns against potential interactions with other medicines (BUT since 2007 there have been no reported adverse interactions with DCA and any other medications).

University of Alberta, Faculty of Medicine and Dentistry, and people of Alberta are currently funding his medical research work with DCA to do the first Human Clinical Trials (these were completed in 2010 - see other videos)

Video Four (May 12, 2010) 9:37 minutes
Generic drug may be potential treatment for deadly brain cancer
https://www.youtube.com/watch?v=RUZn_KnN28w

Dr. Evangelos Michelakis (University of Alberta) revisits his 2007 discovery that you could treat cancer with a simple substance, DCA, that has the chemical structure similar to that of common vinegar.

From 2007 to 2009 findings were verified by many other laboratories including :
Stanford
MIT
Harvard
University of Florida
and others

Michelakis and his team had no support from the Pharmaceutical industry but with private donations and the support of the University Of Alberta Medical Science department they succeeded in conducting the first human trials on a small group of 5 glioblastoma (GBM) cancer patients. .

Michelakis then goes on to speak of Medical Journals and peer reviews on their findings, support for their findings, and the change in the dogma of needing industry support for Generic Drugs.

Dr. Ken Petruk, University of Alberta Department of Surgery, then speaks specifically to the cancer patients and Glioblastoma Multiform and Astrocytoma Grade IV cancer (which affects 23000 people annually in North America). All 5 patients were terminal. GBM is an extremely aggressive cancer that makes treatment difficult and severely limits life expectancy. They found some patients took 2-3 months to get to therapeutic levels of DCA. So one patient died before treatment had really began. The other 4 showed good results and he goes on with specifics. Linda Webster, DCA Projects

Manager, explains how the public, University of Alberta, and Alberta Health Services had to fund this research and regulatory papers themselves (without Pharmaceutical Industry funding).

Video Five (May 12, 2010) 2:02 minutes
Cancer Breakthrough at the University of Alberta
<https://youtu.be/TjAs0AzKtnk>

Dr. Evangelos Michelakis and his team of researchers have now successfully tested DCA on Glioblastoma (GBM) brain cancer patients.

Michelakis has showed dichloroacetate, DCA, reverses the glucose addiction occurring in a cancer cell - meaning DCA will aid in the conventional cancer treatment using chemotherapy and radiation.

DCA is a new direction in the treatment of cancer.

Video Six (2010) 4:51 minutes
Dca cancer statistics (put to music)
(video no longer available, description is here for educational purposes)

Someone put this statistical video up and put it to music. It was done after the first Clinical Trials were completed by the U of A on Glioblastoma (GBM) Brain Cancer Patients in 2010. GBM was chosen as it is one of the most aggressive forms of cancer. This human study on terminal brain cancer patients showed regression in various cancers, that tumors shrunk because DCA changed their metabolism, and in 80% of the cases (4 of 5) there was no further brain cancer growth 15 months after initial treatment, follow up showed cancer cells had been killed.

Video states:
" DCA opens door to new research and IMMEDIATE THERAPY.

Until recently, researchers believed that cancer-affected mitochondria are permanently damaged and that this damage is the result, not the cause, of the cancer.

But Dr. Evangelos Michelakis, at the U of A Department of Medicine in Edmonton, Alberta, Canada, questioned that belief. He began testing DCA, which activates a critical mitochondrial enzyme, as a way to "revive" cancer-affected mitochondria. The results astounded him."

Video then points out that we give billions of dollars to research every year (by running, shaving, buying products, wearing ribbons, buying daffodils) BUT that money is not benefiting anyone because the Pharmaceuticals doing cancer research refuse to work with DCA because they cannot make enough money doing so.

Message: be careful where you donate your cancer research money as it does not have the cure in mind. If you want to fund research contact someone working with DCA or get Pure DCA for someone you know with cancer and do your own research!

Video Seven (2010) 8:30 minutes
Brain Cancer - Patient using DCA since 2005
Part of the video with DCA begins at 3:10 (talks about other stuff before that)
dichloroacetate, B1, Caffeine protocol options

<http://youtu.be/qNi1KmUtLRs>

Patient called Anita is Promoting her "Basic Home Remedies". She has had a Brain Tumor and has survived since 2005. She received her DCA from Amazon (please note that Amazon no longer carries DCA so you must purchase this elsewhere online).

She originally saw and heard about DCA from a Breast, Liver, Brain survivor who used the DCA therapy. She advises that sodium dichloroacetate, DCA, is very powerful and highly effective so you are to take as they direct you. She also recommends that Vitamin B1 (thiamin) be added to assist DCA. DCA is a good cancer fighter by fighting cancer cells. She had no adverse reactions from DCA. She promotes caffeine from black tea as well but that is not correct for Brain cancers.

Video Eight

DCA and Cancer 10:04

"A rather unpleasant secret"

<https://www.youtube.com/watch?v=Anc7Tw2j6vk>

Video Nine (2010) 12:12 minutes

A very good explanation of **how cancer works** with great graphics.

<https://youtu.be/n3qtwpYSTJU>

This is a very good animation done by [CancerQuest](#) to explain what is occurring in the body when it has cancer.

Video Ten (2010) 3:18 minutes

Cancer Cure is close or is it here

<https://youtu.be/o4NTw1mMtq0>

This person did a very easy to follow video describing the U of A research and the affects of DCA on apoptosis (cell death) of sick, diseased, cancer cells. Unfortunately, he mistakenly calls DCA dichloroacetic acid. This is a common mistake as their letters "DCA" are the same.

However, it is vitally important that dichloroACETATE is used - the ACETIC ACID is not the same thing and it is not what is being used in either the cancer research or the cancer therapies. People that read about "dca and toxicity" are reading about the acetic acid form - not the acetate form. The acetate form is not toxic.

Video Eleven (2010) 4:58 minutes

How to measure dichloroacetate

<https://youtu.be/EbLqAFD7Hal>

This is a video instructing patients (or their families) on the correct method to weigh their pure dca powder. Dosing with DCA is a weight based dosage not a volume based dosage so it is to be measured with a medicinal dosing scale not with a teaspoon as this is a volume measurement. DCA reacts to humidity.

Also, oxygen harms DCA - meaning DCA potency is adversely affected by exposure to oxygen. So patients are encouraged to minimum the time their DCA is open to the air. This is why patients are also advised to keep their DCA in the freezer to maintain maximum potency.

Pure DCA capsules were developed to make dosing easier AND to prevent the dca powder excessive exposure to oxygen. If patients find their DCA powder is clumping (called 'caking') then it has been exposed to humidity, oxygen, heat and its potency will be adversely affected. A small amount of clumping is ok though.

Never use hot water as that destroys DCA.

When using the scale, always make sure you are measuring in grams.

Where Do You Go From Here?

You have watched Videos from Researchers during the Initial Discovery (2007), Videos reporting the Results of the First Human Clinical Trials (2010), Medically Vetted Case Study, and various Research papers. A long list of testimonials follows in the second part of this Guide Book

Some of you would find this medical data interesting but many of you will just want to know:

HOW DOES THE THERAPY WORK FOR ME ?

WHAT IS THE TREATMENT FOR MY LOVED ONE ?

Now it is time to instruct YOU and YOUR FAMILY on healing cancer - regardless of the stage or the type of cancer.

If you have not already purchased Pure DCA then do it now because the earlier you start, the faster you can get results.

Purchase online: this is a direct link to the store page

<http://puredca.com/store/>

Orders ship the same day the payment is received.

They ship worldwide.

They currently have shipping offices in the USA, Europe.

They recommend you purchase the Pure DCA 180 capsules at the top of the page as that is the order that receives 120 free thiamin capsules... you will read more about this shortly as you will now be treated as if you are one of their cancer patients - already Healing yourself with Pure DCA.

Pure DCA-Thiamin Therapy

Immediately upon ordering your DCA capsules you will receive an email inviting you to provide your weight and the cancer you are treating. Some patients chose to work with their doctor, oncologist, family, friends - but MOST get customized Dosing Protocols. **This is a free service.**

In addition, you will receive an email with **14 valuable Healing Tips and Recommendations.** These are Life Practices that support the DCA therapy so you and your family get the best results in the shortest amount of time.

As of April 8, 2014 - This is the email:

Thank you for your DCA order. If you wish to get recommended dosing protocols please respond to this email with the type of cancer being treated as well as the person's weight.

Please go to:

<http://puredca.com/healingtips.pdf>

for our List of Healing Tips and Recommendations to aid in your healing process.

PureDCA.com website includes:

- 1) Oncology Research Paper (Non-Hodgkins Lymphoma Patient in remission since 2007 using DCA alone)
- 2) Several 2007 News Videos with the Canadian Researchers when the link between Cancer and DCA was first discovered (in 2007).
- 3) YouTube videos from the Canadian Medical Researchers (May 2010) offering more clinical findings and the information gained from the 2010 Clinical Trials for Glioblastoma Multiforme (GBM). These were the first Clinical trials on humans. Successful.

PureDCA.com Products include:

- 1) Encapsulated DCA (180 x 333mg capsules and 60 x 333mg capsules)
 - 2) Pharmaceutical Grade DCA Powder (3 sizes)
 - 3) Pure Thiamine capsules and Pure Thiamine powder
 - 4) Medicinal Dosing Scale (includes batteries and medicine tray)
 - 5) Pure Powdered NAC (N-Acetyl-Cystine) - watch this video link if you want to know how NAC can help in your healing (offered through DCA for only \$20.95 when added to your DCA order)
- <http://CystineB6.com/>

Thiamine is REQUIRED as part of the DCA cancer treatment to prevent and treat neuropathy. We recommend a daily dose of 750mg (2 of our thiamin capsules).

Yours in Health and Healing,
Harneet Kaur

(To ensure all future communications are received, please add this e-mail address to your safe senders list)

PureDCA.com Things to Remember

Pure DCA Capsules:

1. Store bottles of DCA in freezer.
2. Dosage is **weight**-dependent – [email us](#) with patient's weight for dosage
3. Dosage is **condition**-dependent – [email us](#) with type of cancer for dosage
4. Split daily dose into two servings and take 12 hours apart. If you are taking an odd number of DCA capsules (ie. 3) - take DCA capsule and thiamin capsule in morning upon rising, take another DCA capsule and thiamin capsule just before returning to bed, take one DCA capsule in the middle of the day.
5. Supplement with Thiamine. Recommended Daily Dose is 750mg (2 of our thiamin capsules). Pure Thiamine is available in both Capsules and Powder here: <http://www.DCA.com/store/>
6. DCA can be taken alone or with other cancer treatments (conventional treatments or alternative treatments). DCA has been shown to improve the success of Chemotherapy and Radiation Treatments. DCA does not affect healthy cells and is only looking for “sick cells” so does not interfere with any other treatments.
7. Once cancer is in remission, begin "Maintenance Dosing". This is half the DCA and half the thiamin taken during your initial "Healing Treatment". (Maintenance Dosing is 10mg/kg body weight per day, generally).
8. The maximum Healing Treatment DAILY Dose is 20mg per kg body weight. Healing Brain Cancers is reduced to 15mg/kg body weight per day. Blood Cancers and other System-wide ailments are 10mg/kg daily. Preventative Dosing is 4mg/kg body weight every day.
9. Patients prefer to take thiamin WITH FOOD; DCA can be taken with food or alone (but never with anything HOT as heat destroys DCA).
10. Order again when DCA is received - you do not want to interrupt your treatment by running out of DCA capsules.

Pure DCA Powder:

1. Store bottles of DCA in freezer.
2. Keep the special desiccant package in the bottle after opening - it is designed to eat the oxygen to maintain DCA potency after you have opened it and begun using it.
3. Dosage is by weight not volume. Get a medicinal dosing scale if you are using DCA powder (or thiamine powder). VERY sensitive scale includes batteries. Sensitive to 0.1 grams. [The Digital Medicinal Scale is available here.](#)
4. [Watch video to learn how to measure DCA with your Medicinal Scale](#)
5. Dosage is **weight**-dependent – email us with patient's weight for dosage.
6. Dosage is **condition**-dependent – email us with type of cancer for dosage.
7. Split daily dose into two servings and take 12 hours apart.
8. Take in room temperature water - NEVER hot water.
9. Supplement with Thiamine. Recommended Daily Dose is 750mg (2 of our capsules). Pure [Thiamine is available in both Capsules and Powder here.](#)
10. DCA can be taken alone or with other cancer treatments (conventional treatments or alternative treatments). DCA has been shown to improve the success of Chemotherapy and Radiation Treatments. DCA does not affect healthy cells and is only looking for “sick cells” so does not interfere with any other treatments.
11. Once cancer is in remission, begin "Maintenance Dosing". This is half the DCA and half the thiamin taken during your initial "Healing Treatment".
12. The maximum Healing Treatment DAILY Dose is 20mg per kg body weight. Healing Brain Cancers is reduced to 15mg/kg body weight daily. Blood Cancers and other System-wide ailments are 10mg/kg per day. Preventative Dosing is 4mg/kg body weight per day.
13. Patients prefer to take thiamin WITH FOOD; DCA can be taken with food or alone (but never with anything HOT as heat destroys DCA).
14. Order again when DCA is received - you do not want to interrupt your treatment by running out of DCA powder.

Other Thoughts For Healing

1. Make your body ALKALINE (versus acidic)

Avoid all sugars. Cancer cells feed on sugar. Remember all white rice, white bread, white pasta, crackers, etc. convert to sugar during the digestion process. Alcohol is also pure sugar.

Visit:

<http://tipsforhealthyeating.com/alkaline-diet-tips/>

to get a list of alkaline-producing foods to add to your diet and learn more about healthy eating in general.

2. Your body needs OXYGEN to heal. The OXYGEN needs to get DEEP into your cells.

Slow down and **consciously take Long, Deep Breaths** (filling your stomach and lungs completely and holding your breath as long as possible).

Do this at least three times a day for at least 5 minutes.

Exhale each breath completely before inhaling again.

Ideally you will do the **One Minute Breath:**

Inhale deep and slow for 15 seconds;

Hold the breath for 15 seconds;

Exhale slowly for 15 seconds;

Hold the lungs emptied of air for the final 15 seconds.

You can begin with 5 seconds, increase to 10 seconds, and eventually reach 15 seconds (or longer) for each phase.

3. Be in NATURE as much as possible.

This grounds you in healing energy. Ideally get outside and walk in nature. If you are too sick then position yourself at a window and have a loved one "bring nature to you". The easiest way is to get a bird feeder and hang it outside the window to encourage birds to visit.

Fresh Air, Sunlight are nurturing.

Let "Mother Earth" remind you how to heal. All you have to do is look at the workings in nature to see how it is natural to heal - a tree heals around a broken branch, a forest fire adds nutrients to soil, etc etc etc

4. REDUCE STRESS.

It is a well documented and scientific fact that stress is the silent killer. It affects people in all different ways like creating cancer cells.

It is essential to increase the joy and laughter in your life.

There is no formula for this. It is a personal choice. Sadly many people do not know what motivates them or what gives them joy. You are in a challenging time and I will challenge you to know yourself better... Make a list of things that give you joy, things that make you smile, things that make your heart sing, the things that give you bliss.

The list is personal. No one can do this for you. Make the list and EVERYDAY give thanks for the things on that list.

In whichever way is natural and fun for you, do those things.

5. Have POSITIVE THOUGHTS towards Healing.

Verbalize your thoughts of healing and full health.

Intend to be well and vital.

You have to be Healthy in the mind before your body will respond. Everything your body does originates with a thought – both conscious and unconscious thoughts. When you are hungry your mind tells you you are hungry so you reach for food. When you want to pick up something – the thought precedes the action.

Each breath and each illness originates in the unconscious mind.

Become conscious in your thoughts – don't let doctors and others continually talk about you “being sick” or you will not be well.

YOU have to turn this thought around...

Every time you take a dose of DCA THINK (even say aloud): **“I am healing”** or **“I am healthy!”** .

When others ask you about the cancer... tell them
“I am getting stronger every day!”

6. DRINK LOTS OF WATER - PURE SOURCES without Fluoride and Chlorine

Check your municipal water and do not drink directly from your tap if these chemicals have been added.

Also watch as these chemicals are now being added to bottled drinking water.

7. DO NOT CONSUME ASPARTAME, SUCROSE, or any ARTIFICIAL SWEETENERS

These are well documented to be cancer causing agents.

8. Consume Natural Sources of Thiamine (VITAMIN B1).

The list includes: Oatmeal, brown rice, flax, sunflower seeds, asparagus, kale, cauliflower, potatoes, oranges, liver, eggs, pork, and marmite.

9. DO NOT take any VACCINES or BOOSTER SHOTS

These are full of deadly toxins that your body is unable to process.

10. NEVER USE A MICROWAVE

Microwaves change the chemistry of the food, kill the nutrients, and make food unrecognizable by the body.

11. THROW OUT ALL PLASTICS

Plastics leach poisons into your food when you freeze with them and use them in microwaves. Avoid.

12. REDUCE / ELIMINATE MILK CONSUMPTION

Our bodies were not designed to consume milk after infancy (no mammal except humans drink milk after infancy).

Processed milk has lost its nutritional value.

Cow's milk has such large molecules it is hard for humans to digest;

Milk creates mucus that feeds cancer cells.

If you think you must have milk - **try rice milk or almond milk. Avoid soy milk** as it affects your hormones (ie. Estrogen levels).

13. We highly suggest you add NAC (N Acetyl Cystine B6)

N Acetyl Cystine (B6) is a wonderful healing supplement. In Summer 2013 we added NAC as the "flow agent" in our capsules instead of the industry standard of magnesium stearate. The healing results are even more remarkable and we want everyone to add this to their cancer therapy and treatments

Watch the doctor's video on this webpage for more valuable information: <http://cystineb6.com/>

Remember to add it to your next DCA order.

14. Recent research supports adding the CLA (Conjugated Linoleic Acid)

This supplement should also be added to your Healing Protocol. It reduces inflammation and cancer cells naturally. This supplement is known to assist weight loss but has many other health benefits. To read a summary on this valuable supplement in regards to assisting in cancer therapies, visit this webpage:

<http://tipsforhealthyeating.com/cla-for-safe-weight-loss/>

Book Description:

The American Cancer Society projected 1,638,910 new cases of cancer in 2012 with 577,190 cancer related deaths.

In 2011 it was projected that Canada would have 177,800 new cancer cases and 75,000 deaths related to cancer.

Don't become one of these statistics.

Join the Pure DCA family of patients who have proven that cancer can be beaten... Not in some distant future - but today!

Whether you have chosen to heal yourself with Pure DCA alone, add it to your alternative cancer therapies, or add it to the conventional treatments of chemotherapy, radiation and surgery, support is available every step of the way. It may be a new cancer therapy but it has been proven to be a hugely successful since it first started treating people in 2007.

Mission: Make Cancer an Ailment of the Past

When it was discovered that DCA could shrink tumours was in 2007, Pure DCA was made available to those that wanted access to it. The University of Alberta Medical Research Lab had been able to dramatically shrink brain, breast, and lung cancer cells that had been transplanted into rats. Many people thought those were the ONLY cancers that could be treated. That is NOT so. It was obvious that people needed to be educated that PureDCA could work on all cancers, all stages. Money had simply restricted the testing to those 3 types of cancers.

A website was built to educate people. This website has continually evolved as more information about this non-invasive, harmless cancer therapy was discovered.

Originally, treatment was only available in powder form which was measured, dissolved in water, and immediately consumed by the cancer patient. However, some patients had difficulty dosing so, at their request, it was encapsulated (put in pill form) for ease of dosing in 2009. At the same time, supplementation of thiamin was added to the protocol to both prevent and treat neuropathy (the numbing and tingling that some cancer patients have in their extremities) - especially if they have had chemotherapy.

In summer 2010 the first human trials were completed by the University of Alberta. Although the test group was small - the results were very promising. This clinical trial was for patients with GBM (glioblastoma multiforme), an extremely aggressive brain cancer. Again, limited funding made the trial group small and treatment on only one very aggressive cancer type.

Simultaneously to these 2010 Clinical Lab Trials, practical PROOF was evolving with patients using this IN HOME cancer therapy for 3 years at this point. Chemists had been confident there would be NO HARM as Pure DCA was safer than common table salt and had a chemical composition similar to vinegar. They were right.

In mid-August 2013 the Pure DCA formulation was further improved and the results are ASTOUNDING.

During that time no one advertised Pure DCA.

But, due to its INCREDIBLE healing abilities with all cancers, all stages it is time to make this cancer treatment MAINSTREAM.

What follows is a small list of testimonials that have been received since the IN HOME treatment began. None of the testimonials were paid for. People just wanted to share the FABULOUS results they were getting.

It is our pleasure to include them in this Guide E-book.

Again, it needs to be stressed, these testimonials are NOT SOLICITED! People using DCA sent them in because they were so thrilled and excited with how well DCA worked to treat their cancer.

Bone and Bone Marrow Cancers

1) Rare Bone Cancer

Sat, January 21, 2012 9:01 am

Subject: PureDCA 2-month HEALING COMBO, and after I have finished the 1st month, and have been retested for a supposed untreatable bone cancer related to 3 tours of duty in country, I did in Vietnam, 1965-1969.

Much to the doctors surprise after having 13 head to toe x rays read, and looking at my blood work, the look on his face was one of total disbelief, he could find no trace of the cancer he had told me I had, and which was not there NOW!

Thank-you very much! My question--JT, HSI, recommended your company to me, and said I would probably be on a maintenance protocol of less DCA,B-1,? the rest of my life.

Would you please tell me about this? I want to do this as well, if you offer this. If not perhaps some direction to go?

Sincerely,
JM

2) Bone Cancer

On Fri, March 7, 2014 4:51 pm, mb wrote:

Although I am still waiting for a MRI my PSA and bone scans have turned up normal.

I pray I am on the right path with this. My bucket list is still full! Thanks for your help.

3) Lung with Metastasis to the Bones

Thu, June 20, 2013 12:21 pm

Subject: Lung Cancer, Metastasis to the bones

Mother been diagnosed with the above. The metastasis has spread to 3 places in her spine, both hips, upper ribs and pelvis. Doc says up to 1 year survival. No treatment but possible radiation to one of her nodes by her neck to alleviate pain.

Your product was highly recommended by a friend and has 2 other friends that have used it and having great success.

Does this fit the profile to try your products? Is your product similar to fulvic acid? If you could let me know that would be great.

Thanks
LS

4) Spread to Spine from Bladder Cancer

So primary is bladder cancer...did spread to lung/brain and spine.

This determined January 13 2014.

Surgery done to fractured spine...started with DCA upon receipt of product on Jan 20th (as per prev email 3 capsules of DCA daily and 2 thiamine capsules.

Chemo also in place first session jan20/21/22) and radiation done to spine and brain Results of CAT scan on Feb 11th chest/abdomen/pelvic (after one set of chemo treatment/5 doses of radiation to brain/ spine and 22 days of DCA/ Thiamine...and all other good things for body)

Results are:

- No new evidence of any bone metastases
- Marked improvement in the chest-considerable decrease in size and numberof pulmonary metastatic lesions
- No abnormality in the liver/gallbladder/pancreas/spleen and adrenal glands
- Mass still in the right wall of the bladder however decreased in size

Great news however, will remain diligent

Weight difficult to maintain... and as we are purchasing the powder now would appreciate a response on dosage

Current weight is now 112 lbs (was 120 went down to 107 back up to 112)

Thank you so much for being there

MK

5) Drastic Decrease of Pain in Back

Thu, January 3, 2013 10:33 pm

Dear Harneet,

I need your help again. Thanks God and the DCA-Thiamin, my sister is still alive. She still has pain in the back and is in bed, but the pain level went from 9-10 (80% of the time) to 5-6 (15 to 20% of the time).

She now is completing four months of treatment with DCA, my problem is that I cannot buy it from Amazon and send it to a freight forwarder in Miami.

My question is: how I can buy DCA and can be sent directly to Asunción- Paraguay?

Another question: how many months it is prudent to take the DCA.

Thanks for your attention.

6) Bone Marrow Cancer Blog

Breast Cancers

1) Breast and Lung Cancers

Received November 2013

Good Morning Dr Kaur

I finished my 6-course chemo for treating my breast and lung cancer. All the time I was taking DCA, my oncologist did not know about it. The latest check up (CAT scan, RX, ultrasound) from the middle of Oct 2013 showed significant decreasing the tumor size, from 3.1 mm to 1.8 mm (approx, in all three dimensions), and my collapsed left lung was expanded to the almost full size. Doctor said it is almost unbelievable to have such results after taking the chemo...

I deeply believe that DCA helped me so much.

I have next check up on the end of Dec 2013.

Now I take only DCA and some other supplements for immunity support (coriolus vesicolour mushroom, chaga mushroom, alpha lipoic acid, melatonin, Vit D, seal oil, krill oil, shark cartilage, turmeric, nigella sativa (black cumin) seed oil, aronia juice).

I eat alkaline and ketogenic diet, no meat only white fish 1-2 times per week...

I would appreciate any comment from you...

Thank you,

SP

FYI: as I informed you, my latest CAT scan check up in mid of October 2013, showed tremendous decreasing my breast lump and some lung spots disappeared, some are very decreased in their size.

2) Breast Cancer

Tue, April 9, 2013 7:16 am

Good afternoon Harneet,

Almost exactly a month ago I ordered the 60 day DCA after learning of breast cancer.

Week four of the DCA and week two of a super low carb ketogenic diet to turn off the glucose (for a short while), my tumor is notably smaller and I have every expectation for its disappearance in the coming days.

My question has to do with the DCIS that was diagnosed as cancer (precancer, as it is non invasive) in another area of the same breast. I assume that if the DCA is shrinking the tumor it is going after everything.

I am having an ultra sound on the 19th of this month to confirm tumor shrinkage for the surgeon (and my mother!) and am trying to avoid another mammogram as I have already had two in the last month. I am trying to avoid radiation.

I don't know what your experience is or how extensive the background of those who represent the DCA product. This is medical and may go beyond your expertise.

If you have any insights, please advise.

Yours truly and truly happy, JI

3) I have Stage 4 Metastatic Breast Cancer In Partial Remission with Pure DCA

Received March 13, 2014

I've been taking DCA for almost a year as adjunct therapy along with low dose targeted chemo. I have stage 4 metastatic breast cancer and am now considered to be in a good partial remission. I weigh 118 pounds.

4) Breast Cancer (Male)

On Wed, November 13, 2013

Harneet,

Thank you for getting back to me so quickly. Yea, I thought the cancer had gone too.

SCC

On Tue, November 12, 2013 1:07 pm

Harneet,

I am 47 years old and male. I have not been diagnosed. 4 years ago I noticed a hard lump about the size of an eraser on the end of a pencil in my right nipple.

I ordered DCA then and along with B1 and caffeine pills and coffee I believe I took around 12-15 mg per body weight 4 days on 3 days off. After the first month the lump got squishy and increased in size to about the size of a quarter. After the second month it was gone.

A year later same thing happened so I went for 3 months that time. Well over the summer it showed up again and I used the old stuff to no avail. Then on The DCA Site I read about is losing strength after so many years so I'm ordering more.

I was thinking about going 4 months this time.

Thanks,

SCC

5) Invasive Ductal Breast Cancer Stage 4

Thu, September 12, 2013 4:03 am

Dear Sirs,

I have invasive ductal breast cancer stage 4, I have 52 kilos and I've been using pure dca for 4 month now along with chemotherapy. It seems to be working well and my cancer is in partial remission. What would be the maintenance dosage?

6) Breast Cancer and Lymph Nodes

Tue, October 11, 2011 12:35 am

Dear : Thank you so much I know this helped me a lot. I will do this.

Love and a very thankful

ET

Dear : I had my cancer surgery on Oct 4/11 and they did an lumpectomy and took out five lymph nodes. I got the result of the lab tests back.

On Fri Oct 7th and they said the cancer was clear and I do not need more surgery.

To me this is a miracle and I am so happy that the Lord seen fit that there be no more cancer.

Do I continue taking the Pure DCA pill & the Thiamine B1 until they are gone?

I await your advice. Thank you so very much for everything.
Love ET

7) Lymphnode (Liver, Kidney, Breast, Abdomen, etc.)

Thu, June 21, 2012 12:21 am

So the second report shows positive changes, right? (The doctor says both biopsies missed the cancer. It is hard to know what to believe.)

The first biopsy - no lymph node sample.

Second biopsy one lymph was sampled and it is cancer.

My question: does DCA heal tumors before it heals lymph nodes?

L

Thu, May 3, 2012 3:07 pm

Hi,

I am always researching and have another question. I take 20 drops of lugol's 3 times a day and usually the night dose is within 1/2 from the DCA. Is this ok?

I tolerate the DCA just fine so is it most effective on an empty stomach, or should I eat 1/2 hour later?

The lymphs are aching again, some return of symptoms as previously described. Is this possibly an ongoing thing due to die-off, as the treatment ebbs and flows.....?

Also, is it possible that the DCIS biopsy report is a result of the DCA reversing the cancer? I mean, it's either that, or the doctor doing the biopsy missed the cancer in a guided ultrasound biopsy - 5 times!

The ND / Oncologist has me in line for a PET scan next Wednesday because of the liver / kidney, other breast lump, abdomen, ect..... No sense getting surgery until we get a complete picture....

I am hopeful that the DCA is working it's way through all these issues. Things have moved so slowly with allopathic medicine. I figure it's because the DCA needs time to do it's thing - everything happens for a reason, and I have much faith in this program I am on.

L

Date: Fri, 27 Apr 2012 19:43:13 -0400

Subject: Re: dmsa and other options

Thanks for keeping us informed of your status - and we look forward to hearing how future tests go... as well as what the ND and others recommend... let us know what you decide with the DMSA as it is an easy chelation and you have already done so much to rebalance your health and well being - stay strong !! Blessings Always.

On Fri, April 27, 2012 4:20 pm, Red rdl wrote:

I want to first of all thank you for your feedback each and every time I emailed or phoned you. I guess you know what I've discovered this past couple months - cancer diagnosis is a roller coaster - because one never really knows what's going on inside, ie; are the weird lymph pains because the body is clearing out the dead cells, or is it spreading. (localised pain in the lump area of course is easier to interpret as healing).

Then there are the periods of extreme weakness, sweating, trembling, and for me, all that and over two weeks of chest cold /bronchial. Every day I would feel I was beating the symptoms, and everyday the chest symptoms

came back. Today is day 4 of no real chest symptoms. Today is day 4 where my PH has finally come back to 6 and up to 7, so again, the low ph tells me my body must have been undergoing tremendous cleansing, as I live on green juices and alkaline diet, and use baking soda /lemon if necessary - all to no avail for any real increase in ph! Today, the lump seems to not be protruding as much; a layer of fat seems to tell me the lump has shrunk, yet the width (5 cm) remains the same.

I am very very tired and arms are weak to lift. I am sleeping longer, which is much needed! I have a lump in both breasts, both right in the line of where my lymph glands would be draining from my neck, so the 25 yr. bad metal bridge and root canals obviously have been the main source of this condition. (Root canals and bridge out last Oct. Mercury replaced in '98) I have learned so much these past few months. I have come to believe that some do not fully support DCA because they have invested many dollars in equipment ect. to offer diverse treatment options.

So, here I am, wondering how much money to invest in treatments. The fact 'they' are not taking a closer look at DCA tells me, I should pay more attention to it and DMSA your website offers.... I began high doses of Vit D and Lugol's way back in December. I began juicing and DCA on March 9, 2011, along with alternating supplements and protocols. April 6, I began Mistletoe, Naltrexone, and Metformin, along with low doses of aspirin throughout the day.

Of course NAC has been a cornerstone throughout. The DMSO I started applying topically seems to have made the supplements work better - hence, contributing to the past two week detox.... Next week, I am going for a 2nd opinion to see a ND who is 'trained' in oncology. (not sure what that means, however, if I need (choose) surgery, I have his help. (so far, no surgeon or oncologist has contacted me via 'urgent request at the walk-in - I am from another province...)

So, I have a few days to decide what to do about the DMSA. Your website sounds interesting - 3 days on and 11 (or so) off. It sounds like my kidneys and liver would handle that better than some chelation. *I should mention that with raw garlic I have my blood pressure down to the mid 115's over 55-60, and my March 22 lab tests showed my creatine function actually 'low'. **The blood sugar

I think you'd be on to something with the implicating of self management for individuals in this area. It gives people some control over their diets, gives them something to do, makes them responsible for what they eat, and acknowledges we are unique and everybody's blood sugar is different, yet, it must be kept very low to stop the cancer. That, and cancer cells create a cycle of lactic acid which the liver turns into sugar.....doesn't glutamine reduce the body's lactic acid?

It's probably silly telling you this - what do I know??? In closing, I do not know if you have any feedback about the questions I face. I guess it's really up to me if I want to order your DMSA or do what the ND doctor tells me next week. I guess until I get another MRI or ultrasound I really won't know...

L

The DCA arrived today - thanks

8) Breast Cancer Metastasized to the Lungs

Fri, April 19, 2013 9:50 am

My wife who has breast cancer, and from a recent PET Scan, the doctors are not sure if it has metastasized to the lungs, it is still inconclusive. I have been giving her the DCA since December 2012. I have been going on the high side of the dosing 25mg-30mg per kg. I have adjusted the dose on several occasions because of numbness in her big toe.

I have done 3-7 day drug holidays numerous times. Now she has this coughing episodes that can last up to 5 minutes. At night she can have 3-4 attacks at a time. Her oncologist says that this is the lung cancer taking over her lungs.

Her doctor that had her start on the DCA says that is the release of the histamines of the apoptosis of the cancer cells that is causing the cough. Please give me any insights of your thoughts on this subject.

Thank you
for your time.
Sincerely, R

9) Referred to you by one of my friends

Good morning Doctor,

I was referred to you by one of my friends, CB, who has been using your product. He had brain cancer and is now cancer free because of DCA.

My girlfriend was recently diagnosed with stage 2 breast cancer. She has already gotten a mastectomy done and has already completed chemotherapy (ACT regiment). She has opted for radiation treatment and has opted for proton therapy. The oncologist also informed her that she will have to start a drug called Taxol which she has to take for 10 years.

CB swears by your product and he tells me that DCA helps in all types of cancer.

My questions are, if DCA can stop my girlfriend's cancer from coming back and how can it help? Will it be effective for her even though she has already finished chemotherapy? How does it effect her taxol regiment? Can it be taken simultaneously? What are the side effects?

Any information you can provide would be greatly appreciated.

Thank you,
FP

Colon and Colorectal Cancers

1) Colorectal Cancer 4th Stage Metastatic

On Tue, March 4, 2014 8:24 am, f wrote:

Hi Harnet,

Further to my email to you on January 14th (see below), I just wanted to give you an update. We saw V's oncologist yesterday. Her blood markers are almost in the "normal" range (one of them in fact is). He's ordered another scan to be taken in three weeks.

Her last one (taken about a month ago) revealed that her tumors had shrunk by 60%. He's now talking about how they're going to approach removing the primary tumor.

This is all amazing and has happened in a very short space of time.

We both want to thank you from the bottom of our hearts for making this life saving treatment available.

Kindest regards,

TH

P.S. Her Oncologist told her a year ago that she had 4th stage metastatic colorectal cancer. According to the prognosis given at that time **she should be dead now.**

On 16/01/2014, at 12:08 AM, Harnet Kaur wrote:

well that is fabulous news and at 50kg she was supposed to be taking 3 dca + 2 thiamin daily !! At 60kg, she could be taking 2 dca + 1 thiamin capsule every 12 hours (so 4 dca capsules and 2 thiamin daily)... I will leave it to you to decide whether she continues at current dose or increases it to either 3 or 4 dca daily - thiamin is 2 capsules per day.

Hi

My wife started taking 2 capsules a day with one Thiamine approximately six weeks ago. After the first three weeks she had a scan which revealed a 25% reduction in the size of all six tumors (she has 4th stage metastatic colorectal cancer).

Last week her Oncologist ordered another scan (to be had in three weeks time), as upon physical examination he could not feel any of her tumors.

During this time her weight has increased from 50kg's to 60kg's. Should her dosage be adjusted?

Kind regards,

TH

2) Colon Cancer

Wed, March 21, 2012 2:39 pm

I know that in January when I was on full dose, within a couple of weeks I started feeling AMAZING. I could tell my body had backed off the fight because it wasn't needed, and started healing. I am off chemo completely as of about a month ago.

If I can help my friend too, I will. Meantime, I am awaiting the next scan on 4/2 where I expect to see nothing. I'm almost at full speed but maybe I'm already there.

I have become a little more lazy and laid back this past year, ha! A trend I hope to continue...it's nice...and good for me.

Thank you sooooo much!!! I will await your advice...

MJ

(Seattle, WA)

3) Groin, Chest and throughout Body

Feb. 4 2014

I just had a chest x ray and have no tumours there, im having a colonoscopy done in a week, ill let you know how it goes lol

SW

Dec. 2 2013

kool. my lump hasn't shrunk at all yet but the pain in my groin region has completely went away in 1 week.

SW

(Editor Note: we advise patients to look for a change in density to the tumor not change in its actual size as the body sends fluids to the tumour site to carry off dead cancer cells - in some cases the tumor may appear larger while this is done... think of a sprained ankle and how the body protects the area during healing)

4) Lymphnode (Liver, Kidney, Breast, Abdomen, etc.)

Thu, June 21, 2012 12:21 am

So the second report shows positive changes, right? (The doctor says both biopsies missed the cancer. It is hard to know what to believe.)

The first biopsy - no lymph node sample.

Second biopsy one lymph was sampled and it is cancer.

My question: does DCA heal tumors before it heals lymph nodes?

L

Thu, May 3, 2012 3:07 pm

Hi,

I am always researching and have another question. I take 20 drops of lugol's 3 times a day and usually the night dose is within 1/2 from the DCA. Is this ok?

I tolerate the DCA just fine so is it most effective on an empty stomach, or should I eat 1/2 hour later?

The lymphs are aching again, some return of symptoms as previously described. Is this possibly an ongoing thing due to die-off, as the treatment ebbs and flows.....?

Also, is it possible that the DCIS biopsy report is a result of the DCA reversing the cancer? I mean, it's either that, or the doctor doing the biopsy missed the cancer in a guided ultrasound biopsy - 5 times!

The ND / Oncologist has me in line for a PET scan next Wednesday because of the liver / kidney, other breast lump, abdomen, ect..... No sense getting surgery until we get a complete picture....

I am hopeful that the DCA is working it's way through all these issues. Things have moved so slowing with aopathic medicine. I figure it's because the DCA needs time to do it's thing - everything happens for a reason, and I have much faith in this program I am on.

Subject: Re: dmsa an other options

Thanks for keeping us informed of your status - and we look forward to hearing how future tests go... as well as what the ND and others recommend... let us know what you decide with the DMSA as it is an easy chelation and you have already done so much to rebalance your health and well being - stay strong !! Blessings Always.

On Fri, April 27, 2012 4:20 pm, Red rdl wrote:

I want to first of all thank you for your feedback each and every time I emailed or phoned you. I guess you know what I've discovered this past couple months - cancer diagnosis is a roller coaster - because one never really knows what's going on inside, ie; are the weird lymph pains because the body is clearing out the dead cells, or is it spreading. (localised pain in the lump area of course is easier to interpret as healing).

Then there are the periods of extreme weakness, sweating, trembling, and for me, all that and over two weeks of chest cold /bronchial. Every day I would feel I was beating the symptoms, and everyday the chest symptoms came back. Today is day 4 of no real chest symptoms. Today is day 4 where my PH has finally come back to 6 and up to 7, so again, the low ph tells me my body must have been undergoing tremendous cleansing, as I live on green juices and alkaline diet, and use baking soda /lemon if necessary - all to no avail for any real increase in ph!

Today, the lump seems to not be protruding as much; a layer of fat seems to tell me the lump has shrunk, yet the width (5 cm) remains the same. I am very very tired and arms are weak to lift. I am sleeping longer, which is much needed! I have a lump in both breasts, both right in the line of where my lymph glands would be draining

from my neck, so the 25 yr. bad metal bridge and root canals obviously have been the main source of this condition. (Root canals and bridge out last Oct. Mercury replaced in '98) I have learned so much these past few months. I have come to believe that some do not fully support DCA because they have invested many dollars in equipment ect. to offer diverse treatment options. So, here I am, wondering how much money to invest in treatments. The fact 'they' are not taking a closer look at DCA tells me, I should pay more attention to it and DMSA your website offers.... I began high doses of Vit D and Lugol's way back in December. I began juicing and DCA on March 9, 2011, along with alternating supplements and protocols. April 6, I began Mistletoe, Naltrexone, and Metformin, along with low doses of aspirin throughout the day. Of course NAC has been a cornerstone throughout. The DMSO I started applying topically seems to have made the supplements work better - hence, contributing to the past two week detox.... Next week, I am going for a 2nd opinion to see a ND who is 'trained' in oncology. (not sure what that means, however, if I need (choose) surgery, I have his help. (so far, no surgeon or oncologist has contacted me via 'urgent request at the walk-in - I am from another province...)) So, I have a few days to decide what to do about the DMSA. Your website sounds interesting - 3 days on and 11 (or so) off. It sounds like my kidneys and liver would handle that better than some chelation. *I should mention that with raw garlic I have my blood pressure down to the mid 115's over 55-60, and my March 22 lab tests showed my creatine function actually 'low'. **The blood sugar - I think you'd be on to something with the implicating of self management for individuals in this area. It gives people some control over their diets, gives them something to do, makes them responsible for what they eat, and acknowledges we are unique and everybody's blood sugar is different, yet, it must be kept very low to stop the cancer. That, and cancer cells create a cycle of lactic acid which the liver turns into sugar.....doesn't glutamine reduce the body's lactic acid? It's probably silly telling you this - what do I know??? In closing, I do not know if you have any feedback about the questions I face. I guess it's really up to me if I want to order your DMSA or do what the ND doctor tells me next week. I guess until I get another MRI or ultrasound I really won't know...

L

The DCA arrived today - thanks

Face and Lip Cancers

1) Tumor on Face

On Thu, October 3, 2013 5:31 am

I have been taking the DCA for only 3 days. The enlarged blood vessel under my eye (which I presume is feeding the tumour) has already become less visible. Also, my nose no longer feels that is it being 'pulled off' as the tumour expands behind my face.

If this is the result after only 3/4 days, bring on the next 3/4 months. It will give me GREAT pleasure to walk into The Christie in Manchester (according to them, a pioneering hospital in cancer treatment!!!) and prove them wrong. They wrote me off in 2008 and only put me on palliative care, hence all the problems I have now. My cancer went untreated and is now, according to them, untreatable even with chemo (which I refuse to take).

Thank you so much.

GA

Tue, October 1, 2013 1:46 pm

My former GP in Cyprus (who recommended PureDCA) will be giving me high doses of vit C, glutathione, Q10 by IV when I go over there in a few weeks time.

I will let you know of my progress, as I have more or less been written off by the NHS system, despite surviving for over 11 years, to their surprise

Thank you,

GA

2) Lip Cancer

Wed, July 4, 2012 2:14 pm

I have been using the DCA for several months now to treat my lip cancer. I am seeing improvement. Some days it looks better than others. It will improve in areas, and then a week later, it will look like it is trying to come back in that same spot. I believe it is the seedlings trying to make a new start. I know that my lip cancer was the first one you were aware of using the DCA. I am wondering if maybe we need to be more aggressive.

I know you worry about how the body metabolized the dead tumour tissue, but since mine is an external tumour, and I remove the dead tissue every day, is this still a concern. You did say it was okay for me to increase it by one DCA pill a day, 2 months ago, and I did see more improvement with that. I again would like to increase it by one. I would take 2 in the morning with a Thiamin and one mid day and then 2 again at night with the Thiamin. Do you see any problem with my doing this.

Thank you

HW

3) Received June 9th, 2012 from Amazon (no longer available on Amazon)

I am on my second bottle of DCA. I have seen a reduction in the size of the tumours on my lip. I am confident that this product will kill all the cancer cells. Unlike those with internal cancers, because mine is very visible, it is easy to see the progress I am making. The seller of this product has been very helpful and answers any questions I have within hours of my sending an email. The order is shipped and delivered within less than a week from placing the order.

H

Glioblastoma and Brain Cancers

1) HAD Brain cancer and is now cancer free because of Pure DCA

Good morning Doctor,

I was referred to you by one of my friends, CB, who has been using your product. He had brain cancer and is now cancer free because of DCA.

My girlfriend was recently diagnosed with stage 2 breast cancer. She has already gotten a mastectomy done and has already completed chemotherapy (ACT regiment). She has opted for radiation treatment and has opted for proton therapy. The oncologist also informed her that she will have to start a drug called Taxol which she has to take for 10 years.

CB swears by your product and he tells me that DCA helps in all types of cancer. My questions are, if DCA can stop my girlfriend's cancer from coming back and how can it help? Will it be effective for her even though she has already finished chemotherapy? How does it effect her taxol regiment? Can it be taken simultaneously? What are the side effects?

Any information you can provide would be greatly appreciated.

Thank you,

FP

2) Glioblastoma Multiforme (GBM)

Sat, July 6, 2013 3:57 am

Hi,

My partner has gbm and has been taking dca since diagnosis 18mths ago (recommended by his neuro oncologist). He is doing very well with 70% tumour shrinkage. He is on your 60 day pack, taking 2 dca per day. We understand that this is not the full recommended dose but that is what the DR said.

How much B1 should he be taking with it?

Cheers

S

3) Glioblastoma Multiforme (GBM)

Mon, February 13, 2012 6:23 pm

Hi,

I have finished my dca and can report my tumour has completely disappeared.

I have also been doing monthly courses of temodal (chemo for glioblastoma) and a chez drug avosan.

I am not sure what did it who knows but maybe the dca. I have now run out but wanted to buy some more.

Do you have any information on prolonged use of it. as not sure whether I should keep taking it as a preventative. Anyway I will continue doing the chemo for another few months so would like to take dca intermittently over that period too.

Thanks

J

(Editor Note: He had had GBM before and had surgery but it came back within 4 years - Sept 2011 GBM returned - ordered and began DCA in October and Tumor Completely gone by early February 2012 - Doctor verified and shocked it disappeared so quickly. Patient had numbness in the face for awhile - was taking 2 dca + thiamin in morning and repeated dose 12 hours later daily - only missed dosing with DCA a few days)

4) Glioblastoma Multiforme (GBM)

Wed, April 11, 2012 1:36 am
glioblastoma multiforme
her weight is 225 lbs and 5'9"

amazingly she has improved its unbelievable.

right now she is taking 2 a day'

thank you

5) Brain Tumor - Thalamic Glioma

Wed, February 13, 2013 3:53 am

Hi I been taking DCA alone since dec 8th 2012 and almost done with the bottle this week. My next MRI for my brain tumor is on march 1st. I honestly feel like either the tumor shrunk or disappeared. Reason being is that over the summer, after 3 days of not taking steroids, I lost mobility in my right hand and was limping on my right leg, I also wasn't eating and very tired. Plus I slept a lot. Obviously on steroids, it keeps u moving and active.

Well after a month of DCA, I decided to taper off my steroids and stopped for 4 days and the only thing I experienced was lack of energy and always sleeping. Again I feel like DCA is working. I will find out in a couple of weeks.

By the way my brain tumor is called Thalamic Glioma. I was diagnosed December 2010. Last treatment was chemo on October 2011. It's going to be like 15 months without treatment. My oncologist from the Veterans hospital did not agree with me taking DCA but my nurse told me to try it out. I had to take matters into my own hands and made the choice to take DCA. Anyways I will keep you posted on my MRI results.

Thank you.

Sincerely

CB

6) Brain Tumor

Sun, November 27, 2011 7:28 pm

Hi

I was on some other sites and they were saying to take DCA for 5 days and 2 days off another said 2weeks and 1week off, I wasn't really sure what to do what do you recommend. I've been taking DCA for almost a whole week I'm not sure if it's just in my head or not but I started Monday and

Thursday my head was clearer than it's been in 1 1/2 years.

Thanks CR

P.S. I have a brain tumor just in case that make any difference.

7) Melanoma removed from her Brain

On Sat, August 3, 2013 9:02 am

Subject: Melanoma

My wife, D - age 62, had a melanoma removed from her brain 03-20-13

and it recurred 07-17-13. I received the information about DCA from her oncologist. She weighs 150 lbs. If possible, we would use the 60 day treatment kit if the dosage is Ok for her body weight.

DT

nasopharyngeal cancer has metastasized to lung and bone cancer

8) Spread to Brain from Bladder Cancer

So primary is bladder cancer...did spread to lung/brain and spine. This determined January 13 2014.

Surgery done to fractured spine...started with DCA upon receipt of product on Jan 20th (as per prev email 3 capsules of DCA daily and 2 thiamine capsules Chemo also in place first session jan20/21/22) and radiation

done to spine and brain Results of CAT scan on Feb 11th chest/abdomen/pelvic (after one set of chemo treatment/5 doses of radiation to brain/ spine and 22 days of DCA/ Thiamine...and all other good things for body)

Results are:

-No new evidence of any bone metastases

-Marked improvement in the chest-considerable decrease in size and number of pulmonary metastatic lesions

-No abnormality in the liver/gallbladder/pancreas/spleen and adrenal glands

-Mass still in the right wall of the bladder however decreased in size

Great news however will remain diligent

Weight difficult to maintain... and as we are purchasing the powder now would appreciate a response on dosage

Current weight is now 112 lbs (was 120 went down to 107 back up to 112)

Thank you so much for being there

MK

Liver Cancer

1) Liver and Pancreas Cancer

Received Dec 02, 2013

tumors on liver have shrunk - pancreas tumor shrank - no new cancer cells

Still long way to go but we believe DCA has done it.

name withheld
MA, USA

2) Pancreas and Liver Cancer

Tue, December 11, 2012 11:20 am

Subject: vital and urgent inquiry

Dear Sirs,

A good friend of mine is recovering miraculously from a very aggressive pancreas and liver cancer, thanks to your DCA powder.

Since we have a close relative aged 57 who is suffering a very aggressive linfatic NO Hodgkin cancer, being oxygen dependant since a month ago, with considerable weight loss, can a similar effect / cure be expected, provided an adequate dosage combined with vitamin B is taken by the patient ?

Many thanks for yr reply.

JS

3) Doctors Say He is Already in Remission from Pancreatic and Liver Cancers !

Received March 18, 2014

Just to let you know after a pet scan T's tumors have not spread anywhere else (pancreatic and liver). the Dr. said he is in remission for now - great news. Now deciding on radiation or very low doses of chemo-consulting with Mas General Drs. I firmly believe your products have done this.

JN

4) Liver Cancer

By the way does dca also normalises blood pressure because she has a history of hypertension but I noted that her blood pressure has dropped after she started with dca so much so I want to ask her doctor to reduce her blood pressure medication. Which is a good thing that means less medication going through her system.

Regards,
IS

5) Endocrine Tumor in her Liver

Metastatic Cancer of an unknown origin, with Endocrine Tumor in her Liver and Lungs and the suprarenal gland of her right Kidney

Sun, November 10, 2013 11:23 pm

My mother is 68 years old, (height 5'3, weight 59 kilos) she has metastatic cancer of an unknown origin, with tumors in the lungs, liver and the suprarenal gland of her right kidney has been affected. She has had two chemotherapy sessions of 3 infusions each already.

She started taking DCA a little over two weeks ago (almost three). She feels a lot better and the excess fluid she had accumulated is gone. Her DCA dose is two capsules in the morning and two DCA capsules at night. She also takes a thiamine vitamin capsule in the morning and one at night. I must say, she does not mention having DCA side effects.

RR

On Tue, October 29, 2013 1:20 am

Dear Harneet,

Thank you for your previous email. The recommended DCA dose you mentioned sure has helped my mother who has an endocrine tumor in her liver and lungs. She feels a lot better and her liver function shows some progress.

She just finished her second chemotherapy session last Wednesday Oct. 23, 2013.

RR

Date: Fri, 18 Oct 2013 12:23:57

Dear Harneet,

Thank you for the email.

My mother is quite ill, she has cancer with an endocrine tumor in her liver with unknown primary origin. Metastasis is present, mainly affecting her lungs, and suprarenal gland (right side).- She has started chemotherapy, her second session will begin monday October 21 2013.

Age: 68 years old, female.

Weight: 69 kilograms.

Please advise me as of the recommended DCA and thiamine dose for her.

All your comments are most welcome!

Thank you,

RR

6) Liver Cancer

Wed, July 31, 2013 4:31 pm

I did as your recommendation and it worked. the pet scan on 07/24/2013 showed the cancer is decreased in size,

I would like to continue the treatment and I need your recommendation again please.

I thank you in advance,

AN

On Mon, May 27, 2013 4:36 pm

Hi, Thank you in advance for your help. in January 2013, CT revealed two right hepatic lesions, treated with chemotherapy X 6,last treatment

04/24/2013. medications: Gemzar & Abraxane

Weight: 140 Lb

Age: 59

Best Regards,

AN

On 05/27/13

Hi there and thank you for your quick respond. I have purchased these for my brother. I have copied him here to provide the information you are inquiring.

AN

7) Liver and Lung Cancers

Fri, July 8, 2011 6:19 pm

Hello

I have a question regarding DCA. My mother has been taking dca for the last month and a half already and currently she is having some side effects with the medicine. Her legs and hands is shaking constantly, and she even feels lots of pain on her right leg, and can barely walk. She is currently taking the recommended dosage for her weight, which is 1.2 grams per day (one half in the morning and the other half during evening) and she is also taking the vitamin B1 thiamine capsules 375mg twice per day, and drinking lots of green tea.

As for the benefits of dca, she does seem to feel better after the second week of taking the medicine, but still seems very week. We are going to make a check up next week on her lungs and liver (which has cancer cells) to see the effects of dca on the tumors.

Now my question is, how can we help her reduce her shaking and leg pains. Is it ok to take more thiamine capsules? Please, help us find out the best solution for her side effects!

Thank you so much !

Waiting for your reply soon :-)

WJY

8) Lymphnode (Liver, Kidney, Breast, Abdomen, etc.)

Thu, June 21, 2012 12:21 am

So the second report shows positive changes, right? (The doctor says both biopsies missed the cancer. It is hard to know what to believe.)

The first biopsy - no lymph node sample.

Second biopsy one lymph was sampled and it is cancer.

My question: does DCA heal tumors before it heals lymph nodes?

The DCA arrived today - thanks

Lung Cancers

1) 4th Stage of Lung Cancer, Brain Cancer, Throat Cancer

Harneet: Started the DCA about 5 months ago, do you have my back emails, I went to the Iowa Ctie Iowa cancer center, They took a bioupies of one lung. no cancer, this week a MRI of the brain, nothing found, the 25th they go through my throat to check the limp nodes, then later the lower back into the bottom of the lungs to check. Looking good, I think the docs are stumped, my lungs look bad but so nothing, Whats you think.
Thanks- JW. Iowa

Mon, January 21, 2013 12:47 pm

Harneet: Hi, I just ordered a bottom of DCA. Going into Iowa Citie - U OF Iowa ,
Friday, going to check the limp nodes in my throat for cancer, last 2 showed no cancer, I had 4 th. stag of lung cancer and they say so far none, If ever thing comes out okey , can I cut down on this med.
Thanks - JW

Mon, January 7, 2013 11:54 am

I came down with stag 4 lung cancer last year, I took 15 chemos, 4 months ago I found out about DCA, I have now changed to Iowa Citie Ia. cancer center, There are testing me now, They took a piece out of the tumer in my right lung and tested no cancer, Then a brain MRI and no cancer, next is a test on my limp nodes in my throat . Then next is a sample from the bottom of my lungs, Things are looking good and 5 weeks with no chemo.
I feel great,
Thanks for the DCA,
JW

Tue, December 4, 2012 10:45 am

Harneet: Had a cat scan Monday for my lung cancer, It has stopped for 3 months now, I take 2 DCA in mornig and a B1, noon 1 DCA and night 2 DCA and 1 B1, I am going to order when I hear back from you.
Thanks
JW, The dca is working.

2) Stage 4 Small Cell Lung Cancer; Metastasized to Liver

Mon, March 4, 2013 12:20 pm

Diagnosed 1 1/2 yrs. ago as Stage 4 small cell lung cancer Metastasized to liver

165 lbs. 6'. Functioning as if a healthy person. Low stamina.

On current regimen 3 months: Taking 4 caps dca daily: 1 at 12:00; 1 at 6:00; 2 at midnight and 5 days on/2 days off protocol (that is old information we recommend 7 days a week protocol at that dose)

Results:

- Lungs X-ray as clear.
- No cancer found in rest of body.
- Current regimen stops pain in liver, but gives frequent mild nausea, moderate tiredness, recurring heartburn, and occasional spaced out feeling. Very similar to chemo. (this patient took caffeine which we do not recommend)
- MRI showed a considerable slowing of the progression of the disease in my liver.
- Largest lesion has reduced to 6.4 cm x 6 cm. There are others which are smaller.

Please comment or give recommendations

Thanks for your follow up.

PW

3) Metastatic Cancer of an unknown origin, with Endocrine Tumor in her Liver and Lungs and the suprarenal gland of her right Kidney

Sun, November 10, 2013 11:23 pm

My mother is 68 years old, (height 5'3, weight 59 kilos) she has metastatic cancer of an unknown origin, with tumors in the lungs, liver and the suprarenal gland of her right kidney has been affected. She has had two chemotherapy sessions of 3 infusions each already.

She started taking DCA a little over two weeks ago (almost three). She feels a lot better and the excess fluid she had accumulated is gone. Her DCA dose is two capsules in the morning and two DCA capsules at night. She also takes a thiamine vitamin capsule in the morning and one at night.

I must say, she does not mention having DCA side effects.

RR

Tue, October 29, 2013 1:20 am

Dear Harneet,

Thank you for your previous email. The recommended DCA dose you mentioned sure has helped my mother who has an endocrine tumor in her liver and lungs. She feels a lot better and her liver function shows some progress.

She just finished her second chemotherapy session last Wednesday October 23, 2013.

RR

Date: Fri, 18 Oct 2013 12:23 am

Dear Harneet,

Thank you for the email.

My mother is quite ill, she has cancer with an endocrine tumor in her liver with unknown primary origin. Metastasis is present, mainly affecting her lungs, and suprarenal gland (right side).- She has started chemotherapy, her second session will begin monday October 21 2013.

Age: 68 years old, female.

Weight:69 kilograms.

Please advise me as of the recommended DCA and thiamine dose for her.

All your comments are most welcome!

Thank you,

RR

4) Lung Tumor Stage IV with 7.3 cm diameter and with a metastasis

I am happy to confirm that my husband who was diagnosed a adeno cancer on the lung tumor Stage IV with 7,3 cm diameter and with a metastasis on the other lung this year April 2013 has been submitted to medical treatment of Chemo therapy alongside with stereotactic radiotherapy and after 2 chemo treatments at same time as DCA on a daily basis the tumor reduced almost 50% and after 4 months of extra 4 treatments of chemo plus 7 radio he was considered cured after 6 months in September 2013

I believe that the fact DCA was given at same time has helped for this fantastic and quick result and I wish to share with you our happiness.

Thank you. Kind regards

Name withheld by request

Original Portuguese version:

Tenho prazer de confirmar que o meu marido a quem foi diagnosticado em Abril de 2013 um adenocarcinoma Estadio IV no pulmão direito com 7,3 cms de diâmetro com metástase do lado esquerdo , apos ter sido submetido a 2 tratamentos Quimioterapia e 2 tratamentos de radioterapia verificou-se ter o tumor regredido quase 50% em volume.

Apos os 2 tratamentos fez mais 4 de quimioterapia e 7 de radioterapia tendo sido considerado apos 6 meses em Setembro de 2013 como curado.

Acompanhou o tratamento hospitalar com DCA numa base diária recomendada Acredito que o DCA ajudou a esta fantástica recuperação e cura pelo que gostaria de convosco partilhar a nossa alegria. Obrigada.

5) Received June 7th, 2012 from Amazon (no longer available on Amazon)

Have just received my second order of this product. A PET scan taken 6 weeks after beginning shows that a previously rapidly growing nodule has become arrested. Confidence is such that my Pulmonologist and I feel comfortable in holding off a further scan and office visit until near the end of the year. If such scan shows continued improvement, would then upgrade my rating to 5-star. Has already put off surgery for which I was being vetted. Dosage of these orders is just about right for my weight (150 pounds) and will begin researching the end game when the time comes. Have no ill side effects. Needless to say, my Oncologist is highly interested.

C

6) Lung Cancer [asbestos incurred]

Received Aug 26, 2013

Sir: Thank-you.

I find myself in an unusual situation - stuck between the VA and AMA, very much like living a Kafka novel.

Last VA Doctor, after CT scan, one <1> week ago, had a very hard time understanding the tumors he was comparing to the previous CT <6 months earlier> showed no growth . They shrunk, he had nothing to say!

I continue to control inflammation and your direction for dosage

JM

{That is wonderful news J - keep it up and keep them guessing - hopefully they will ask and you can coach them how to cure cancer !}

On Fri, July 26, 2013 12:50 pm,

I have started DCA and supplement treatment for lung cancer [asbestos incurred]. I am also controlling Chronic Lumbar Pain, with a great deal of success. I do not think invasive measures are appropriate. However, I believe that long term tumor control may be possible; with DCA regimen. I am a male 66 years old, weight 220 lbs., 6' 5", and was exposed to asbestos while refitting a US Navy destroyer for duty off Viet Nam, 1968, at the Napa Valley Ship and Sub Yard in California. My Question is: What is the dosage that is specific to my description?
Sincerely,
JM

7) Small Cell Lung Cancer, Stage 4

Wed, September 18, 2013 12:28 pm

Hello,

On November 28, 2012, my father was diagnosed with small cell lung cancer. He has gone through a series of chemo and radiation treatments. A friend of ours purchased your product and found significant results and now has returned back to work.

With my friend experiencing excellent results I am eager to have my father begin the medication. My father is currently prescribed several medications and wonder if beginning DCA would have a negative reaction with the medications. Could you please tell me if these medications would have a negative effect to the recovery of my father's treatment.

I would like to have my father begin the DCA as soon as possible. He has been diagnosed with stage 4, small cell lung cancer.

Thank you for your time,

LM

8) Breast and Lung Cancers

Good Morning Dr Kaur

I finished my 6-course chemo for treating my breast and lung cancer. All the time I was taking DCA, my oncologist did not know about it. The latest check up (CAT scan, RX, ultrasound) from the middle of Oct 2013 showed significant decreasing the tumor size, from 3.1 mm to 1.8 mm (approx, in all three dimensions), and my collapsed left lung was expanded to the almost full size. Doctor said it is almost unbelievable to have such results after taking the chemo...

I deeply believe that DCA helped me so much.

I have next check up on the end of Dec 2013.

Now I take only DCA and some other supplements for immunity support (coriolus vesicolour mushroom, chaga mushroom, alpha lipoic acid, melatonin, Vit D, seal oil, krill oil, shark cartilage, turmeric, nigella sativa (black cumin) seed oil, aronia juice).

I eat alkaline and ketogenic diet, no meat only white fish 1-2 times per week...

I would appreciate any comment from you...

Thank you,

SP

FYI: as I informed you, my latest CAT scan check up in mid of October 2013, showed tremendous decreasing my breast lump and some lung spots disappeared, some are very decreased in their size.

9) Lung Cancer, Metastasis to the Bones

Thu, June 20, 2013 12:21 pm

Subject: Lung Cancer, Metastasis to the bones

Mother been diagnosed with the above. The metastasis has spread to 3 places in her spine, both hips, upper ribs and pelvis. Doc says up to 1 year survival. No treatment but possible radiation to one of her nodes by her neck to alleviate pain.

Your product was highly recommended by a friend and has 2 other friends that have used it and having great success. Does this fit the profile to try your products? Is your product similar to fulvic acid? If you could let me know that would be great. Thanks

LS

11) Lung and Liver Cancer

Fri, July 8, 2011 6:19 pm

Hello,

I have a question regarding DCA. My mother has been taking dca for the last month and a half already and currently she is having some side effects with the medicine. Her legs and hands is shaking constantly, and she even feels lots of pain on her right leg, and can barely walk. She is currently taking the recommended dosage for her weight, which is 1.2 grams per day (one half in the morning and the other half during evening) and she is also taking the vitamin B1 thiamine capsules 375mg twice per day, and drinking lots of green tea.

As for the benefits of dca, she does seem to feel better after the second week of taking the medicine, but still seems very week. We are going to make a check up next week on her lungs and liver (which has cancer cells) to see the effects of dca on the

tumors. Now my question is, how can we help her reduce her shaking and leg pains. Is it ok to take more thiamine capsules? Please, help us find out the best solution for her side effects!

Thank you so much! Waiting for your reply soon :-)

WJY

12) Nasopharyngeal Cancer has Metastasized to Lung and Bone Cancer

On Sat, August 3, 2013 9:02 am,

Subject: Melanoma

My wife, D - age 62, had a melanoma removed from her brain 03-20-13 and it recurred 07-17-13. I received the information about DCA from her oncologist. She weighs 150 lbs. If possible, we would use the 60 day treatment kit if the dosage is Ok for her body weight.

DT

13) Small Cell Lung Cancer

Mon, August 26, 2013 8:57 am

Hello! Cancer is non small cell lung cancer and weight is 55 kg Thanks for your information on diet!

IK

14) Spread to Lung from Bladder Cancer

So primary is bladder cancer...did spread to lung/brain and spine. This determined January 13 2014. Surgery done to fractured spine...started with DCA upon receipt of product on Jan 20th (as per prev email 3 capsules of DCA daily and 2 thiamine capsules Chemo also in place first session jan20/21/22) and radiation done to spine and brain Results of CAT scan on Feb 11th chest/abdomen/pelvic (after one set of chemo treatment/5 doses of radiation to brain/ spine and 22 days of DCA/ Thiamine...and all other good things for body)

Results are:

- No new evidence of any bone metastases
 - Marked improvement in the chest-considerable decrease in size and number of pulmonary metastatic lesions
 - No abnormality in the liver/gallbladder/pancreas/spleen and adrenal glands
 - Mass still in the right wall of the bladder however decreased in size
- Great news however will remain diligent
Weight difficult to maintain... and as we are purchasing the powder now would appreciate a response on dosage
Current weight is now 112 lbs (was 120 went down to 107 back up to 112)
Thank you so much for being there
MK

Lymphomas, Leukemias and Blood Cancers

1) Non-Hodgkins Lymphoma

Fri, August 30, 2013 12:49 pm

I am a repeat customer. My husband is in remission from Non-Hodgkins Lymphoma. This order is for a maintenance dose of one capsule per day. Thank you

2) Blood Markers

Tue, May 15, 2012 8:33 pm

Hi

I have been taking DCA now for over a month and I feel Great!

All blood values look great now.

JH

3) Blood Cancer Markers

Thu, February 2, 2012 3:32 pm

Hi Harneet

Thank you for information.

In my blood test results there were no cancer markers...

Thanks for your help

A

4) Blood Markers

Sun, May 26, 2013 8:44 pm

Hello Harneet, my name is DC. I have received the DCA that i orderd last week and i have to tell you that the PSA in my system has dropped from 23 to 9.5 and the docter called me into his office and told me to have the best weekend ever and i asked him why and he told me that the PSA dropped to 1.13 is that not great or what. Now i need to know how much of DCA to use to keep this problem under controll or i would like to talk to some one that knows more about this DCA so can you please call me on my cell as i am working out of town and this is the only way so please give me a call on the cell----- any time .

Thank You.

DC

5) Lymph Nodes

Thu, January 24, 2013 6:09 pm

Sent: Thursday, January 24, 2013 4:55 PM

Subject: DCA

My niece took this treatment for a cancerous tumor that could not be removed because of its location & size. It totally removed the tumor! She did not realize she should keep taking the treatment after her tumor was gone & cancer came back in her lymph nodes. How long does one have to keep taking this in order to totally defeat the cancer?

MC

6) Lymph Nodes and Breast Cancer

Tue, October 11, 2011 12:35 am

Dear Harneet: Thank you so much I know this helped me a lot. I will do this.

Love and a very thankful

ET

Dear Harneet : I had my cancer surgery on Oct 4/11 and they did an lumpectomy and took out five lymph nodes. I got the result of the lab tests back on Fri Oct 7th and they said the cancer was clear and I do not need more surgery. To me this is a miracle and I am so happy that the Lord seen fit that there be no more cancer.

Do I continue taking the Pure DCA pill & the Thiamine B1 until they are gone?

I await your advice. Thank you so very much for everything.

Love

ET

7) Leukemia - Chronic Myeloid Leukemia Philadelphia Chromosome Negative

Received March 17, 2014

Dear Harneet Kaur,

I am writing you again and sending my Mothers (AJ) lab results so you can see the progress with the DCA. In January 2014 my Mom's results came back good again and she is only on 1 Chemo Hydrea every other day. Also Dr Irwin Walker at the Juravinski Hospital and Cancer Centre in Hamilton, Ontario has shown much interest in the DCA after seeing my mothers results.

MN

On Wed, November 13, 2013 10:40 pm

Hi Harneet Kaur,

I am writing a follow up on my Moms results with the DCA.

As it states in the letter below she was diagnosed with Cancer Leukemia in August. I am sending you her results to look over. She is feeling very good and the doctor is stretching her visits out longer with thus next time being 5 weeks till her next check up. He is very pleased. He has reduced her Chemo tablets from 4 per day to just one per day. If her next blood work comes back good would it be advisable to drop the last chemo tablet and just continue on the DCA? Can you please look at her blood work and let me know how it looks to you please:) Thank you so much !!!

MN

On Fri, October 4, 2013 11:58 pm

Hi I am writing you to show you some of the results my Mom has had with the DCA. My Mom was very sick and went to the hospital on August 22nd 2013 with a white blood count of over 300. The doctor put her on Chemo she was very sick. My son had heard about the DCA so I ordered it. On August 29th I took her to the cancer Doctor and he told me she had Chronic Myeloid Leukemia Philadelphia Chromosome Negative. He did not give a good prognosis. So I mentioned that I would like to start her on the DCA. He had heard about it and said no problem and thanked me for telling him. At this visit her white blood count went to 32.5 after being on Chemo. We started the DCA on the 30th of August. On our next visit to the cancer hospital her white blood count dropped to 5.4 this was one week later on September 5th 2013. Two weeks later on September 19th her white blood work came back at 2.8. She had been on 4 Chemo tablets a day he cut her down to two. On September 26th 2013 on her next visit her white blood count again was at 2.8. He cut her down to only one chemo tablet per day. She is feeling very good except for her fracturing 3 vertebrae in a unfortunate mishap. I feel the DCA is giving her great results could you please explain what is happening here. Should she stay on the same dosage of DCA that you had recommended? Are these promising results for her? Thank you so much !!!
Have a beautiful day,
MN

On Fri, August 30, 2013 11:56 am

Good afternoon I am sending the results of my Moms Cancer. Please let me know of any recomondations. I have made her doctor aware of the DCA and he is very supportive.
Thank you
Have a beautiful day,
MN

On Wed, August 21, 2013 10:49 am

Thank you my Mom has been told she has Leukemia they have just done a bone marrow biopsy yesterday and we should know more about the stage she is in as well as what type of leukemia. She is on Hydrea (Hydroxyurea) Mar-Allopurinol & Apo-Prochlorazine at this time. Her weight is 71 Kilos.
Is she safe to start the DCA right now or should she wait till she has her final diagnoses? And what is her recommended dosages. Is this safe for her to take along with all those meds she is on and do you recomend I inform her doctors?
Thank you so much !
MN

8) Lymph Nodes (and Pancreatic Cancer)

Wed, November 16, 2011 8:13 am

Hello ,

Father has been taking 20mg/kg DCA for pancreas cancer for the last 2.5 months. And also 900mg B1 daily, with some B complex. He was off DCA 3 days/week as per your last month recommendation; however he has developed more neuropathy including shaking, tremor and stool inconsistency. We stopped DCA for a week now but the symptoms are somehow still persisting.

His latest ct Scan was good with very much shrunk and regressed lymph nodes and no suspicious mass. His overall condition is fine, and has gained some weight.

What is your recommendation regarding the DCA side effects? I really want to give him this, but don't want to mess up his nerves either.

Thank you,

Kind regards,

T

9) Bilirubin Counts Improved

Sat, September 7, 2013 9:22 am

No he has not stopped. My understanding is that someone left the bottle out. Are the capsules as pure as the powder? Do they require the same freezer protocol? The results we were getting were fabulous. His bilirubin went from 25 to 1 in weeks.

GS

10) Blood markers in Correct Range

On Tue, March 4, 2014 8:24 am, f wrote:

Hi Harnet,

Further to my email to you on January 14th (see below), I just wanted to give you an update. We saw V's oncologist yesterday. Her blood markers are almost in the "normal" range (one of them in fact is). He's ordered another scan to taken in three weeks. Her last one (taken about a month ago) revealed that her tumors had shrunk by 60%. He's now talking about how they're going to approach removing the primary tumor.

This is all amazing and has happened in a very short space of time.

We both want to thank you from the bottom of our hearts for making this life saving treatment available.

Kindest regards,

TH

P.S. Her Oncologist told her a year ago that she had 4th stage metastatic colorectal cancer. According to the prognosis given at that time she should be dead now.

On 16/01/2014, at 12:08 AM, Harnet Kaur wrote:

well that is fabulous news and at 50kg she was supposed to be taking 3 dca + 2 thiamin daily !! At 60kg, she could be taking 2 dca + 1 thiamin capsule every 12 hours (so 4 dca capsules and 2 thiamin daily)... I will leave it to you to decide whether she continues at current dose or increases it to either 3 or 4 dca daily - thiamin is 2 capsules per day.

On Tue, January 14, 2014 9:15 pm, f wrote:

Hi Harnet,

My wife started taking 2 capsules a day with one Thiamine approximately six weeks ago.

After the first three weeks she had a scan which revealed a 25% reduction in the size of all six tumors (she has 4th stage metastatic colorectal cancer).

Last week her Oncologist ordered another scan (to be had in three weeks time), as upon physical examination he could not feel any of her tumors. During this time her weight has increased from 50kg's to 60kg's. Should her dosage be adjusted ?

Kind regards,

TH

11) Lymph Nodes (and Liver, Kidney, Breast, Abdomen, etc.)

Thu, June 21, 2012 12:21 am

So the second report shows positive changes, right? (The doctor says both biopsies missed the cancer. It is hard to know what to believe.)

The first biopsy - no lymph node sample.

Second biopsy one lymph was sampled and it is cancer.

My question: does DCA heal tumors before it heals lymph nodes?

L

Thu, May 3, 2012 3:07 pm

Hi,

I am always researching and have another question. I take 20 drops of lugol's 3 times a day and usually the night dose is within 1/2 from the DCA. Is this ok?

I tolerate the DCA just fine so is it most effective on an empty stomach, or should I eat 1/2 hour later?

The lymphs are aching again, some return of symptoms as previously described. Is this possibly an ongoing thing due to die-off, as the treatment ebbs and flows.....?

Also, is it possible that the DCIS biopsy report is a result of the DCA reversing the cancer? I mean, it's either that, or the doctor doing the biopsy missed the cancer in a guided ultrasound biopsy - 5 times!

The ND / Oncologist has me in line for a PET scan next Wednesday because of the liver / kidney, other breast lump, abdomen, ect..... No sense getting surgery until we get a complete picture....

I am hopeful that the DCA is working it's way through all these issues. Things have moved so slowing with aopathic medicine. I figure it's because the DCA needs time to do it's thing - everything happens for a reason, and I have much faith in this program I am on.

L

Subject: Re: dmsa an other options

Thanks for keeping us informed of your status - and we look forward to hearing how future tests go... as well as what the ND and others recommend... let us know what you decide with the DMSA as it is an easy chelation and you have already done so much to rebalance your health and well being - stay strong !! Blessings Always.

On Fri, April 27, 2012 4:20 pm, Red rdl wrote:

I want to first of all thank you for your feedback each and every time I emailed or phoned you. I guess you know what I've discovered this past couple months - cancer diagnosis is a roller coaster - because one never really knows what's going on inside, ie; are the weird lymph pains because the body is clearing out the dead cells, or is it spreading. (localised pain in the lump area of course is easier to interpret as healing).

The there are the periods of extreme weakness, sweating, trembling, and for me, all that and over two weeks of chest cold /bronchial. Every day I would feel I was beating the symptoms, and everyday the chest symptoms came back. Today is day 4 of no real chest symptoms. Today is day 4 where my PH has finally come back to 6 and up to 7, so again, the low ph tells me my body must have been undergoing tremendous cleansing, as I live on green juices and alkaline diet, and use baking soda /lemon if necessary - all to no avail for any real increase in ph!

Today, the lump seems to not be protruding as much; a layer of fat seems to tell me the lump has shrunk, yet the width (5 cm) remains the same. I am very very tired and arms are weak to lift. I am sleeping longer, which is much needed! I have a lump in both breasts, both right in the line of where my lymph glands would be draining from my neck, so the 25 yr. bad metal bridge and root canals obviously have been the main source of this condition. (Root canals and bridge out last Oct. Mercury replaced in '98) I have learned so much these past few months.

I have come to believe that some do not fully support DCA because they have invested many dollars in equipment ect. to offer diverse treatment options. So, here I am, wondering how much money to invest in treatments. The fact 'they' are not taking a closer look at

DCA tells me, I should pay more attention to it and DMSA your website offers.... I began high doses of Vit D and Lugol's way back in December. I began juicing and DCA on March 9, 2011, along with alternating supplements and protocols. April 6, I began Mistletoe, Naltrexone, and Metformin, along with low doses of aspirin throughout the day. Of course NAC has been a cornerstone throughout. The DMSO I started applying topically seems to have made the supplements work better - hence, contributing to the past two week detox....

Next week, I am going for a 2nd opinion to see a ND who is 'trained' in oncology. (not sure what that means, however, if I need (choose) surgery, I have his help. (so far, no surgeon or oncologist has contacted me via 'urgent request at the walk-in - I am from another province...)) So, I have a few days to decide what to do about the DMSA.

Your website sounds interesting - 3 days on and 11 (or so) off. It sounds like my kidneys and liver would handle that better than some chelation.

*I should mention that with raw garlic I have my blood pressure down to the mid 115's over 55-60, and my March 22 lab tests showed my creatine function actually 'low'. **The blood sugar - I think you'd be on to something with the implicating of self management for individuals in this area. It gives people some control over their diets, gives them something to do, makes them responsible for what they eat, and acknowledges we are unique and everybody's blood sugar is different, yet, it must be kept very low to stop the cancer. That, and cancer cells create a cycle of lactic acid which the liver turns into sugar.....doesn't glutamine reduce the body's lactic acid? It's probably silly telling you this - what do I know??? In closing, I do not know if you have any feedback about the questions I face. I guess it's really up to me if I want to order your DMSA or do what the ND doctor tells me next week. I guess until I get another MRI or ultrasound I really won't know...

L

The DCA arrived today - thanks

Internal Organ and Other Testimonials

1) Bladder Cancer (that Spread)

So primary is bladder cancer...did spread to lung/brain and spine. This determined January 13 2014.

Surgery done to fractured spine...started with DCA upon receipt of product on Jan 20th (as per prev email 3 capsules of DCA daily and 2 thiamine capsules

Chemo also in place first session jan20/21/22) and radiation done to spine and brain

- Results of CAT scan on Feb 11th chest/abdomen/pelvic (after one set of chemo treatment/5 doses of radiation to brain/ spine and 22 days of DCA/ Thiamine...and all other good things for body)

Results are:

-No new evidence of any bone metastases

-Marked improvement in the chest-considerable decrease in size and number of pulmonary metastatic lesions

-No abnormality in the liver/gallbladder/pancreas/spleen and adrenal glands

-Mass still in the right wall of the bladder however decreased in size

Great news however will remain diligent

Weight difficult to maintain... and as we are purchasing the powder now would appreciate a response on dosage

Current weight is now 112 lbs (was 120 went down to 107 back up to 112)

Thank you so much for being there

2) Endometrial Stromal Sarcoma Cancer

On Wed, July 17, 2013 8:16 am

It was 14.6 x 8.3cms

Now it is 11.4 x 5.4cms

About 3cms each side?

Many thanks Harneet

SH

3) Pancreas Cancer

Wed, November 16, 2011 8:13 am

Hello ,

Father has been taking 20mg/kg DCA for pancreas cancer for the last 2.5 months. And also 900mg B1 daily, with some B complex. He was off DCA 3 days/week as per your last month recommendation; however he has developed more neuropathy including shaking, tremor and stool inconsistency. We stopped DCA for a week now but the symptoms are somehow still persisting.

His latest ct Scan was good with very much shrunk and regressed lymph nodes and no suspicious mass. His overall condition is fine, and has gained some weight.

What is your recommendation regarding the DCA side effects? I really want to give him this, but don't want to mess up his nerves either.

Thank you,

Kind regards,

T

4) Liver and Pancreas Cancer

Received Dec 02, 2013

tumors on liver have shrunk - pancreas tumor shrank - no new cancer cells - still long way to go but we believe DCA has done it.

name withheld

MA, USA

5) Doctors Say He is Already in Remission from Pancreatic and Liver Cancers !

Received March 18, 2014

Just to let you know after a pet scan T's tumors have not spread anywhere else (pancreatic and liver). the Dr. said he is in remission for now - great news. Now deciding on radiation or very low doses of chemo-consulting with Mas General Drs. I firmly believe your products have done this.

JN

6) Unknown Cancer

Tue, April 19, 2011 6:03 pm

Dear ,

How are you? My sister in Ho Chi Minh city Viet Nam is doing better after taking the DCA. She looks and feels better. She still has about 3 or 4 treatments with her doctor in Saigon and she also

religiously take DCA twice daily. Could I please buy another bottle for her. Thank you and kind regards.

MND.

7) Terminal Cancer

Wed, December 14, 2011 9:12 am

no thanks. I have a very accurate and extremely expensive lab scale. btw, my 'terminal' tumours have reduced considerably since taking dca. :0)

14) Big Change for the Better

Sat, March 26, 2011 4:03 pm

Dear ,

Thank you for your kind wishes for my recovery. I am seeing a big change for the better. I am very hopeful that I will be able to resume my daily dosage within weeks, and am hopeful that the correct dosage will be effective.

Best wishes,

N

Prostate Cancers

1) Prostate Cancer

On Mon, July 15, 2013 10:03 am

prostate cancer 160 pounds

Hello Harmeet,

It's been some time since I've been in touch. Thank you for all your help and advice. I want to let you know that my dad has had great results from using DCA. After recent tests the doctor said he can see no trace of cancer! My dad wants to continue taking it as a preventive measure, so I need to purchase some more.

Thanks and have a great day

DF

2) Prostate Cancer

Sat, June 30, 2012 5:13 pm

Subject: DCA working, but discomfort

Message Body:

Ultra-sound shows a reduction of tumor size! Prostate tumor was 3.19cm in March.

Friday, June 29 tumor ultra-sound was showing shrunk down to 2.9cm. Having some real pain though. Pray for me.

HRG

Thu, April 26, 2012 4:11 pm

Dear Folks,

I have been taking your DCA/Thiamine for about 6 days and already noticing major affects occurring. Sleeping has improved! Slight discomfort in groinal area yet I was to expect the cancer to be reacting to the change in environment and tissues around the area are slightly irritated as my immune is kicking up to deal with the change in the cells. Looks very positive!

I was privileged to speak at a Cancer Support Group session and passed out data about the DCA/Thiamine protocols you offer. One RN from Bay Area Urology of Traverse City was very impressed with the data and wants me to speak again next month. I was very surprised my onocologist and RN have been "very" supportive of my decision to opt out (postpone) surgery to remove my prostate and let DCA do it's work for 30 days. My PSA has dropped 10 points already.

Thanks very much!

God's blessing on you all,

HRG

3) Groin and throughout Body

Feb. 4 2014

I just had a chest x ray and have no tumours there, im having a colonoscopy done in a week, ill let you know how it goes lol

Dec. 2 2013

kool. my lump hasn't shrunk at all yet but the pain in my groin region has completely went away in 1 week.

SW

4) Prostate Cancer

Fri, July 26, 2013 11:33 am

Hello Harneet and thank you so much for the information. I will order more products from you once I receive my first shipment. I am searching for treatment for a 94 year old with prostate cancer, he only weighs 137 pounds currently. He has had two treatments of firmagon. As I continue each day to learn more about conscience heathy living I will continue to place orders for myself as well. Thank You for your conscience contribution to the value of human life and research.

Sincerely,

DR

★★★★☆ **It seems to work for me** June 7, 2012

By Chuck

Amazon Verified Purchase

Have just received my second order of this product. A PETscan taken 6 weeks after beginning use shows that a previously rapidly growing nodule has become arrested. Confidence is such that my Pulmonologist and I feel comfortable in holding off a further scan and office visit until near the end of the year. If such scan shows continued improvement, would then upgrade my rating to 5-star. Has already put off surgery for which I was being vetted. Dosage of these orders is just about right for my weight (150 lbs) and will begin researching the end game when the time comes. Have no ill side-effects. Needless to say, my Oncologist is highly interested.

★★★★★ **Pure DCA** June 9, 2012

By Heather

Amazon Verified Purchase

I am on my second bottle of DCA. I have seen a reduction in the size of the tumours on my lip. I am confident that this product will kill all the cancer cells. Unlike those with internal cancers, because mine is very visible, it is easy to see the progress I am making. The seller of this product has been very helpful and answers any questions I have with in hours of my sending an email. The order is shipped and delivered within less than a week from placing the order.

Comment | Was this review helpful to you?

Note that these are reviews from Amazon. Due to pressure from the big pharmaceutical companies Amazon no longer allows the sale of DCA. They have also stopped the sale of MANY other supplements sold by a variety of vendors because many natural supplements threaten the profits of large pharmaceutical companies.

Thanks!

AW (daughter of MW in Iowa)

Mom is in a study in Florida for Life Extension - remember she had had chemo and cancer came back !! She refused more chemo and started DCA and CT scan clear for months

9) Pancreatic Cancer and Gaining Weight since Taking Pure DCA

Wed, November 16, 2011 8:13 am

Hello ,

Father has been taking 20mg/kg DCA for pancreas cancer for the last 2.5 months. And also 900mg B1 daily, with some B complex. He was off DCA 3 days/week as per your last month recommendation; however he has developed more neuropathy including shaking, tremor and stool inconsistency. We stopped DCA for a week now but the symptoms are somehow still persisting. His latest ct Scan was good with very much shrunk and regressed lymph nodes and no suspicious mass. His overall condition is fine, and has gained some weight. What is your recommendation regarding the DCA side effects? I really want to give him this, but don't want to mess up his nerves either.

Thank you,

Kind regards,

T

20) Sister Still Alive Because of DCA

Thu, January 3, 2013 10:33 pm

Dear Harneet,

I need your help again. Thanks God and the DCA-Thiamin, my sister is still alive. She still has pain in the back and is in bed, but the pain level went from 9-10 (80% of the time) to 5-6 (15 to 20% of the time). She now is completing four months of treatment with DCA, my problem is that I cannot buy it from Amazon and send it to a freight forwarder in Miami.

My question is: how I can buy DCA and can be sent directly to Asunción-Paraguay? Another question: how many months it is prudent to take the DCA. Thanks for your attention.

21) Thank You For Saving So Many Lives

Fri, June 7, 2013 6:04 am

Subject: bladder cancer

Chemo kills people, poisoning people with the very radiation that causes cancer is stupid.

So, my father was tested for having a lump on his bladder, he was a smoker, no results yet, so let's just say I'm preparing just in case.

If it turns out to be cancer, how much of this should he take daily? How long? And is there anything he must avoid while on this.

Thank you for saving so many lives, without lying to make a profit like all these scum bag pharmaceutical companies.

Get back to me soon please, Thank you.

SH

23) Why are Other Companies charging so Much More than PureDCA.com??

I have a pharmacy in Canada that is charging \$340cad for 60 capsules with 400mg each. They claim they have pure and certified dca. Is yours certified as well and if so, what do you think the difference is, why such big difference in price? Where is your DCA manufactured please?

Answer: we most certainly have pure dca as it is WE who are the ones that have instructed doctors and pharmacists around the world how to use dca to cure cancer... it is also important to note that pharmacies do NOT have the correct equipment so the dca you are getting from them will NOT be as good as ours... we have instructed groups to use equipment that prevents oxygen from coming in contact with the dca as it decreases the potency of the dca the longer it is exposed... we manufacture in bulk and have an oxygen-free room as well as the proper equipment

the reason they chose 400mg is to "copy" our well established protocol of 333mg dca + 375mg thiamin capsules

there is no store front - you must order online - that is one of the ways we are able to keep our costs down (we also do not advertise and patients spread the word of our successful cancer treatments)

PureDCA Effective in Animals

1) Lymphoma (Cat)

Wed, May 9, 2012 12:11 pm

Himalayan cat, 11 years old, named Piggy who has Lymphoma

Piggy is doing much better and his tumor right now has shrunk down to just a little scar tissue in his neck. He is vocal again and eating. We will keep him on the DCA and hope for the best.

2) Tumour Shrinkage (Dog)

sat, May 4, 2013 7:16 pm

Hi Kevin,

Just to let you know, that after seeing Lady's tumor growth to the size of a melon, red, and hard, just in the last 5 days, every day the tumor has shown decrease, and right now is the size of a big lemon... It is working!

I will keep you updated in the progress... what a miracle you are carrying!

Many, many thanks,

A

3) Good things about the effects of DCA

Comments: Hello, I have heard many good things about the effects of DCA on cancerous tumors and i need to know the dosing of a canine that weighs 120 lbs could you please let me know asap as i am eager to help my boy get rid of this or at least make him feel better as he is 15 years old and after consulting the vet the normal treatment of chemo would most likely do more harm than good. if you could call me i would appreciate it (phone number removed)

Thank you very much

DCA (DiChloroAcetate) CANCER CURE IS ON THE MARKET

Subject: DCA (DiChloroAcetate) CANCER CURE IS ON THE MARKET !!!!!

In January, 2008, I was diagnosed with myeloma, aka "bone marrow cancer". One cyber bud forwarded the DCA CANCER CURE DISCOVERY at University of Alberta, Canada. As DCA was proving effective on other cancers, and myeloma wasn't on the test schedule, I went another route that CURED MYELOMA in @ 6 weeks.

DCA is an off drug patent medicine that was originally prescribed to patients with unusual medical issues, and it worked. In 2007, DCA's CANCER KILLING ability was discovered, literally, by accident. As it had already been approved for humans, by the USA FDA, and Canadian equivalent, it could go directly to human testing for "new use", and it worked on nearly 100 % for all cancer test subjects.

Because DCA is VERY INEXPENSIVE, NO GREEDY PIG PHARMA HAS EXPRESSED ANY INTEREST IN MASS PRODUCING AND SELLING TO CANCER PATIENTS. Well, here is the first entrepreneur, who has come my way via my long time cyber budette, Kel, who also helped save my life in 2008. In 2008, According to DCA CANCER KILLING DISCOVERER, DR. MIKAELAKIS (SP), DCA CURES VARIOUS CANCERS WITHIN 30 DAYS, WITH FEW TO NO MINOR SIDE EFFECTS.

I await a callback from the seller, as I have several questions.

In the meantime, if you are interested, here is the contact info.

<http://www.puredca.com/> or call: 347-535-4322. This is in New York. A 60-day supply of DCA is \$299.95 (dca 60 capsules is \$119.95)

5) Croatian Group speaking on Web Forum - "experimental group for the treatment with DCA and they were healed"

Respected, I am writing to you because I found your web site. I think you are the reference center for sale and healing with DCA. I am writing you from Croatia - EU. I find on your web also instructions on Croatian language... Some people recommended you from my country on forum, they were in the experimental group for the treatment of DCA and they were healed. But do not mention the names of their doctors. I presume that you know and to cooperate with some of doctors from Croatia. I wish you would give me the address or phone number of one of the doctor with whom you collaborate in Croatia. To me could expertly advise for the take complete treatments and right doses of DCA. I have a lot of serious problems with my health. In brief: I have very strong pain in my legs, hips and bones about a year, I drink pain killers - 800 mg x 3 daily (ibuprofen) these will damage my stomach and I have very difficult to walk! I am enclosing you some documents in attachments. And more, I ask you to recommend me some dealer of your products here in Europe? I apologize for the possible grammatical mistake in my text! I am waiting for your reply, Or in advance sincerely grateful KS from Rijeka, Croatia.

We will be providing more information on this therapy in upcoming blog posts and on the IHC website.

10) <http://curezone.com/forums/fm.asp?i=1919986> (Bret, American Cancer Advocates)

Once again we saw another tremendous response using DCA this week. Stage IV lung adenocarcinoma. We haven't used this in the first five years of our organization because of FDA issues. Now it's available and we are always amazed at its rapid effect on fermentation. Even in pets. All of our clients get weekly lactic acid testing and many of our clients have lactic acid levels that are below normal. Even topically with DMSO it shrinks tumors over night...at least in the patients we have used it for. Please give this drug a look. It has been used in other countries to treat lactic acidosis. It's no wonder why a compound that prevents fermentation is also seen to help cancer patients. When using DCA in high tumor loads you must watch for tumor lysis syndrome. In last year and a half we have seen five patients experience rapid cancer cell die offs and were sent to E.R. for treatment of high potassium, phosphates, and uric acid. High fever is first symptom of this. High potassium can cause arrhythmias as well. Bret

Other Benefits of Pure DCA Therapy

1) DCA reverses Pulmonary Hypertension

Sat, November 12, 2011 8:25 pm

Hi ,

Thank you for getting back to me. I actually discovered dca from a recent abstract from a paper in Pub Med which I have attached to this email as a PDF. The title of the paper is:

Dichloroacetate prevents and reverses pulmonary hypertension by inducing pulmonary artery smooth muscle cell apoptosis.

You can imagine my excitement when I read the title because after becoming all too aware of this condition, all I ever come across is "no cure, death by right side heart failure, high morbidity rate, progressively degenerative, nothing to treat the condition, just ease the symptoms," etc. so my future was feeling rather bleak.

If you are not familiar with PAH it is the even more rare condition that affects the smooth muscle endothelial cells in the blood vessels in the pulmonary artery. Something triggers the mitochondria to turn off the cell apoptosis so proliferation of the cells go unchecked, constricting the vessel making the heart work harder to get enough oxygenated blood through the body, eventually leading in most cases to death by right-side heart failure. Based on extensive research of available studies, papers, etc. I believe that although there are many contributing factors as to the cause of this change, serotonin syndrome from the use of SSRIs and or candida albicans from an unbalanced gut flora due to antibiotic use, stress, etc. and gluten intolerance leading to leaky gut which allows the candida to overgrow into the rest of the body. All fungi whether it be yeast or mold adapt very quickly to whatever host cell they become attached - say like endothelial cells - and at the same time they take on the cells attributes, they also change the cell metabolism to glycolytic which prefers sugars - of which our horrible western diets have more than enough... Anyway, those points are secondary to the apoptosis trigger being shut off and if DCA can get it turned back on, it could be the cure myself and others had few hopes of ever finding.

There are quite few papers on Pub Med regarding DCA....I've attached the one mentioned above and another I found to be quite informative but if you check out the website yourself, you will find fairly exhaustive information that I hope you can use to help me with a treatment plan - let's make history together and figure out how to incorporate DCA with other natural approaches such as supplementation (especially magnesium) diet along with lifestyle changes to create a regimen that will hopefully have me the first person to be cured of this horrible condition! I am willing to take the risks associated with un-tested therapies because I have nothing to lose except my life in the next year or two if we don't do anything and my PAH progresses as per the average which is 3-5 years upon diagnosis. Next week I begin year three since being told the news, so time is of the essence.

Again, thank you for getting back to me and I am hopeful that this is the start of something wonderful but understand that there is always a very good chance that this could simply be another dead end that just looked like the right path. All I ask is for honesty and total disclosure of one's opinions, beliefs, etc. in regards to working with me in my quest to restore optimal balance to my body and I will always do the same. Basically, no sugar-coating any hard realities or decisions, is what I ask. Please advise as to what you think the next step should be (if any at all) and I will comply.

Sincerely,

SH

2) PureDCA has also Normalized my Blood Pressure

By the way does dca also normalises blood pressure because she has a history of hypertension but I noted that her blood pressure has dropped after she started with dca so much so I want to ask her doctor to reduce her blood pressure medication. Which is a good thing that means less medication going through her system.

Regards,
IS

3) Lyme Disease

Wed, March 30, 2011 4:06 pm

Hi,

A friend of ours from Texas had mentioned to us that an individual with cfs-lyme had used the product and had great benefit from the dca they said he had it assayed by a lab and it tested very good, so he suggested we buy our products from you. I'll see if I can find out how to contact the person that had the lab work done.

Thanks
RR
